Strandings, Ways to Save Whales Frank Donald Robson, Nick Carter, 1984 **Strandings** Frank Donald Robson, 1984

NOAA Technical Report NMFS, 1984 Case Studies in Bayesian Statistics Constantine Gatsonis, James S.

Hodges, Robert E. Kass, Nozer D. Singpurwalla, 2012-12-06 The past few years have witnessed dramatic advances in computational methods for Bayesian inference As a result Bayesian approaches to solving a wide variety of problems in data analysis and decision making have become feasible and there is currently a growth spurt in the application of Bayesian methods The purpose of this volume is to present several detailed examples of applications of Bayesian thinking with an emphasis on the scientific or technological context of the problem being solved The papers collected here were presented and discussed at a Workshop held at Carnegie Mellon University September 29 through October 1 1991 There are five major articles each with two discussion pieces and a reply These articles were invited by us following a public solicitation of abstracts The problems they address are diverse but all bear on policy decision making Though not part of our original design for the Workshop that commonality of theme does emphasize the usefulness of Bayesian methods in this arena Along with the invited papers were several additional commentaries of a general nature the first comment was invited and the remainder grew out of the discussion at the Workshop In addition there are nine contributed papers selected from the thirty four presented at the Workshop on a variety of applications This collection of case studies illustrates the ways in which Bayesian methods are being incorporated into statistical practice The strengths and limitations of the approach become apparent through the examples Marine Mammals Ashore Joseph R. Geraci, Valerie J. Lounsbury, 2005 Comprehensive manual for understanding and carrying out marine mammal rescue activities for stranded seals manatees dolphins whales or sea otters **The Cultural Lives of Whales and Dolphins** Hal Whitehead, Luke Rendell, 2014-12-04 An astonishing unconstrained exploration of the nature and practice of cetacean culture a revolutionary book Philip Hoare author of *The Whale* In the songs and bubble feeding of humpback whales in young killer whales learning to knock a seal from an ice floe in the same way their mother does and in the use of sea sponges by the dolphins of Shark Bay Australia to protect their beaks while foraging for fish we find clear examples of the transmission of information among cetaceans Just as human cultures pass on languages and turns of phrase tastes in food and in how it is acquired and modes of dress could whales and dolphins have developed a culture of their very own Unequivocally yes In *The Cultural Lives of Whales and Dolphins* cetacean biologists Hal Whitehead who has spent much of his life on the ocean trying to understand whales and Luke Rendell whose research focuses on the evolution of social learning open an astounding porthole onto the fascinating culture beneath the waves As Whitehead and Rendell show cetacean culture and its transmission are shaped by a blend of adaptations innate sociality and the unique environment in which whales and dolphins live Drawing on their own research as well as a scientific literature as immense as the sea including evolutionary biology animal behavior ecology anthropology psychology and

neuroscience Whitehead and Rendell dive into realms both humbling and enlightening as they seek to define what cetacean culture is why it exists and what it means for the future of whales and dolphins And ultimately what it means for our future as well *Marine Mammal Strandings in the United States* ,1991 **Marine Mammal Strandings in the United States**
