Annual Report Ontario. Department of Agriculture and Food,1896 **Punch** Mark Lemon, Henry Mayhew, Tom Taylor, Shirley Brooks, Francis Cowley Burnand, Owen Seaman, 1895 What causes Momentum Returns? Evidence from different Asset Classes Fabian Hertel, 2022-03-21 Seminar paper from the year 2021 in the subject Business economics Investment and Finance grade 2 0 University of M nster language English abstract This paper discusses possible asset specific and cross asset explanation approaches for momentum appearance The two main threads in literature stock momentum and momentum of other assets are discussed separately and subsequently checked for overlaps The paper also deals with the definition of momentum as an anomaly itself in context of rational and behavioral concepts It uncovers selected contrary observations and outlines possible conformities Capital market anomalies are a phenomenon triggering ongoing debates about the trading behavior of investors on financial markets They are contradicting the core ideas of the efficient market hypothesis EMH which considers financial markets efficient and investors rational and fully informed One of the EMH key hypotheses especially supported by Fama and by Samuelson is the principle of random walk If this principle holds the prices of assets on financial markets are only influenced by public and firm specific news develop apart from that completely random and are not predictable However empirical observations question the random walk principle They tend to indicate specific patterns in asset price developments instead of complete randomness Doubts on the EMH and the random walk principle thus cannot be neglected A common answer to these observations is the existence of additional risk factors which are currently not covered by the applied pricing models Current asset pricing models mainly rely on Markowitz 1952 and the modern portfolio theory as well as on the Capital Asset Pricing Model CAPM from Sharpe 1964 Lintner 1965 and Mossin 1966 These models are rather a benchmark for asset pricing than perfect constructions covering all and any existing risk factors which are relevant for an assets price formation *American Economist* ,1899 *Broadcasters and Market Behaviour* ,1991 **The Cornhill Magazine** ,1889 **The World's Work** ,1919 A history of our time **The Eclectic Magazine of Foreign Literature, Science, and Art** ,1889 **The right and wrong of compulsion by the State.
