corporate data architectures The book considers how the techniques of data management can be applied in the wider community of business institutional and organizational settings and considers how new types of data from the EDIFACT world can be integrated into the existing data management environments of large data processing functions This wide ranging text considers existing work in the field of data resource management and extends the concepts of data resource valuation References are made to new aspects of metrics for data value and how they can be applied It will interest strategic business planners information systems and DP managers and executives data management personnel and data analysts and academics involved in MSc and BSc courses on Data Analysis CASE repositories and structured methods     Strategic Management of Complexity Susanna Mandorf,2011-11 Doctoral Thesis Dissertation from the year 2009 in the subject Business economics Business Management Corporate Governance grade A Comenius University in Bratislava Department of Management course Corporate Management language English abstract KAPLAN NORTON suggested an enlargement or change of the BSC perspectives to be able to adjust the scorecard system to the individual situation of each company They were aware that their four classic perspectives were not the central dimensions for every time but need to be adjusted when the economic environment of a company changes Exactly such a change happened when the digital economy appeared That is a main reason why a new perspective is important to consider the e business strategy In practice most of the SME use only the four basic perspectives that are described in the fundamental literature They do neither dare to create alterations of the perspectives nor to change or modify the shown procedure These companies need a support how to add the e business perspective to consider the digital economy For this reason it is necessary to give stimulation to the business practice how to handle goals structures and initiatives of such a new perspective There is a permanently increasing supply of hardware and software solutions to support or partly take over the processes of the company The balanced scorecard respects soft facts in its calculations In the digital economy these soft facts become more and more important In former times the managing directors of SME often ignored the knock on effect of soft facts They orientated mainly about financial figures But the digital economy has to consider different strategies Some statistics depict that even up to 80% of a company s profits in the digital economy depend on soft facts Managers have to learn dealing with soft facts and intrinsic values As DRUCKER says the experience of every employee can be used as a source of value added An employ     **Development and Management of a Computer-centered Data Base** ,1964     **Strategic Data Planning** Dale L. Goodhue,2015-08-05 Excerpt from Strategic Data Planning Lessons From the Field Many large organizations today are finding that even if they can access data from multiple functions the lack of logical data integration common data definitions and codes across information systems makes it difficult or impossible to answer cross functional or cross divisional questions This reduces their ability to take advantage of potential opportunities or respond to business problems Strategic Data Planning is one methodology which can address such problems within the general umbrella of information engineering Resting on the assumption that a relatively stable group of

data entities lies at the center of an organization's information processing needs SDP is a formalized top down data centered planning approach that builds a model of the enterprise its functions and its underlying data as a basis for identifying and implementing an integrated set of information systems In spite of strong conceptual arguments for the value of the SDP approach and its use in many organizations empirical researchers have failed to find clear cut evidence of its general success This raises the question of whether the approach is universally appropriate If success is somewhat problematic are there lessons that can be drawn from actual organizational experience The purpose of this paper is to report the results of a series of case studies of SDP efforts to offer insights on the conditions under which SDP is most effective and to propose directions for future research About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**Data Strategy** Sid Adelman, Larissa Terpeluk Moss, Majid Abai, 2005 Without a data strategy the people within an organization have no guidelines for making decisions that are absolutely crucial to the success of the IT organization and to the entire organization The absence of a strategy gives a blank check to those who want to pursue their own agendas including those who want to try new database management systems new technologies often unproven and new tools This type of environment provides no hope for success Data Strategy should result in the development of systems with less risk higher quality systems and reusability of assets This is key to keeping cost and maintenance down thus running lean and mean Data Strategy provides a CIO with a rationale to counter arguments for immature technology and data strategies that are inconsistent with existing strategies This book uses case studies and best practices to give the reader the tools they need to create the best strategy for the organization
