*The Handbook of Non-Invasive Transcranial Brain Stimulation in the Cognitive Domain* Vincent Van Waes, Jean-Pascal Lefaucheur, Andrea Antal, Alexander T. Sack, Chris Baeken, 2025-12-05 The Handbook of Non Invasive Transcranial Brain Stimulation in the Cognitive Domain serves as an essential resource capturing the latest advancements and scientific insights into non invasive brain stimulation methods. This comprehensive volume delves into various techniques such as repetitive transcranial magnetic stimulation and low intensity transcranial electrical stimulation. It highlights their application in understanding psychophysiology and enhancing cognitive performance in both experimental models and healthy individuals. Such methods offer substantial promise in unraveling the complexities of neural network dynamics and cognitive functions. In addition to discussing foundational methods and experimental models the book also explores therapeutic applications for neurological and neuropsychiatric disorders. These multimodal brain stimulation approaches present innovative avenues for potential treatments. By integrating both theoretical and practical perspectives this handbook not only reviews existing data but also opens new horizons for future research and clinical applications providing invaluable insights for professionals in the field. Enables better understanding of the neuronal functions and neuromodulation techniques and their applications in the cognitive domain. Provides an update on the current development of non invasive brain stimulation techniques and their future potential. Reviews and assesses clinical results obtained in the treatment of the cognitive aspects of various psychiatric or neurological diseases.
