Building the Arkansas Innovation Economy National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,Committee on Competing in the 21st Century: Best Practice in State and Regional Innovation Initiatives,2012-12-03 A committee under the auspices of the Board on Science Technology and Economic Policy STEP is conducting a study of selected state and regional programs in order to identify best practices with regard to their goals structures instruments modes of operation synergies across private and public programs funding mechanisms and levels and evaluation efforts The committee is reviewing selected state and regional efforts to capitalize on federal and state investments in areas of critical national needs Building the Arkansas Innovation Economy Summary of a Symposium includes both efforts to strengthen existing industries as well as specific new technology focus areas such as nanotechnology stem cells and energy in order to better understand program goals challenges and accomplishments As a part of this review the committee is convening a series of public workshops and symposia involving responsible local state and federal officials and other stakeholders These meetings and symposia will enable an exchange of views information experience and analysis to identify best practice in the range of programs and incentives adopted Drawing from discussions at these symposia fact finding meetings and commissioned analyses of existing state and regional programs and technology focus areas the committee will subsequently produce a final report with findings and recommendations focused on lessons issues and opportunities for complementary U S policies created by these state and regional initiatives Since 1991 the National Research Council under the auspices of the Board on Science Technology and Economic Policy has undertaken a program of activities to improve policymakers understandings of the interconnections of science technology and economic policy and their importance for the American economy and its international competitive position The Board s activities have corresponded with increased policy recognition of the importance of knowledge and technology to economic growth One important element of STEP s analysis concerns the growth and impact of foreign technology programs 1 U S competitors have launched substantial programs to support new technologies small firm development and consortia among large and small firms to strengthen national and regional positions in strategic sectors Some governments overseas have chosen to provide public support to innovation to overcome the market imperfections apparent in their national innovation systems

They believe that the rising costs and risks associated with new potentially high payoff technologies and the growing global dispersal of technical expertise underscore the need for national R D programs to support new and existing high technology firms within their borders **Innovation Policy in the Knowledge-Based Economy** M.P. Feldman,Albert N. Link,2012-10-23 Scholars in the science and technology field have not collectively questioned much less proposed an agenda for policy makers Now is an appropriate time for such an undertaking First there is a growing belief that the U S national research and development system like that of many industrial nations is changing due to global competitive pressures and advancements in information technology and electronic commerce Second industry s R D relationship with the academic research community is changing not only because of the global competition but also because of alterations in the level of government support of fundamental research As a result policy makers will need to rethink their approaches to science and technology issues This volume is a collection of essays by scholars about innovative policy in the knowledge based economy By knowledge based economy we mean one for which economic growth is based on the creation distribution and use of technology As such innovation policy in such an economy must enhance the creation distribution and use of knowledge that leads to the creation distribution and use of technology This volume considers elements of an innovation policy innovation policy and academic research innovation policy in electronic commerce and innovation policy and globalization issues

Advanced Introduction to Technology Policy Albert N. Link,James Cunningham,2021-05-28 Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the social sciences business and law expertly written by the world s leading scholars Designed to be accessible yet rigorous they offer concise and lucid surveys of the substantive and policy issues associated with discrete subject areas This insightful Advanced Introduction provides an in depth review of current US technology policy tracing the legislative history of policies such as the Economic Recovery Tax Act the Small Business Innovation Development Act and the National Cooperative Research Act The critical elements of the ecosystem in which technology policy exists are also discussed with a particular focus on US patent policy and US investments in infrastructure technology Key features include Historical trace of US technology policy ideas over the past 75 years Comparison of US technology policies to those in other nations Agenda for future thinking about US technology policy Integrated discussion of US technology policy Economic rationale for US technology policy This Advanced Introduction will be invaluable for international business leaders and policymakers in addition to scholars in economics public administration business and public policy **Global Technology Transfer** John Chumack,2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit

from it stands out This book presents the issues and offers a comprehensive bibliography for easy access *Technology Policy* Georg Aichholzer, Gerd Schienstock, 2010-09-15 No detailed description available for Technology Policy

Technology and Economic Policy Ralph Landau, Dale Weldeau Jorgenson, 1986 **Linking Trade and Technology Policies** National Academy of Engineering, Steering Committee on Linking Trade and Technology Policies, 1992-02-01 How is technology changing the nature of global competition Can governments devise policies that help to create comparative advantages for national firms An international group of experts in trade and technology policy addresses these questions in a book that contributes to a better understanding of how U S approaches to such policies differ from those of other industrialized countries It explores current trends in trade and technology policies and the consequences for U S economic competitiveness Topics discussed include the changing positions of the United States Japan and Germany in technological and trade competition the management of trade conflict in high technology industries and new approaches to linking trade and technology policy The book highlights the critical interplay of domestic and international policies and underscores the need for policymakers to achieve greater complementarity between their domestic and international economic policies
