**Self-building in Shared Urban Open Spaces** Carolin Mees, 2018-04-12 The book investigates the development of community gardens with self built structures which have existed as a shared public open space land use form in New York City's low income neighborhoods like the South Bronx since the 1970s These gardens have continued to be part of the urban landscape until today despite conflicting land use interests changing residents groups and contradictory city planning Both community gardens and self built structures are created in a participatory design and self built effort by urban residents and are an expression of the individual gardeners preferences their cultural background and the decisions made by the managing residents group in regards to the needs of their neighborhood Ultimately community gardens with self built structures are an expression of the people's will to commonly use this land for open and enclosed structures next to their homes in the city and need to be included in future urban planning

## **Photography, Architecture, and the Modern Italian Landscape**

Lindsay Harris, 2024-11-19 Photography Architecture and the Modern Italian Landscape explores the impact of photography at a pivotal moment in Italian architecture and culture focusing on the period between 1910 and the mid 1970s The book analyzes architectural photographs taken by Italian cultural figures who helped transform the Italian landscape into what we know today This study charts the oscillation of Italians ideas about what progress signified For example the book demonstrates that for writers and artists familiar with ancient ideas about civilization in 1910 the Roman countryside exemplified the contradictions inherent in primitivism On the one hand their photographs praised the region's primordial beauty yet their images condemned the crudeness of local living conditions More broadly it traces the history of primitivism

and photography in Italy to show how cultural leaders alarm at the nation's pre modern living conditions their aspiration to modernize them and their grasp of photography to catalyze the process helped forge the modern Italian landscape its monuments housing infrastructure and natural environments At the same time it explores a vibrant period in photographic history when the advent of photographic reproduction as a commercial process developed into a medium with its own visual style capable of shaping ideas about modernity This new image making and reproduction technology empowered Italy's cultural leaders not simply to represent the Italian landscape through photography but to determine how it developed Of interest to researchers and students from a range of disciplines modern architecture photography and Italian studies this book demonstrates the power of art to transform society and to reformulate our ideas of progress *Machines for Living* Victoria Rosner,2020 Machines for Living shows how the modernization of the home led to profound changes in domestic life and relied on a set of emergent concepts including standardization scientific method functionalism and efficiency science that form the basis of literary modernism and stand at the confluence of modernism and modernity **Modern**
