The Mollusca Reproduction

Thomas Griffiths

The Mollusca Reproduction:

Biology and Evolution of the Mollusca, Volume 1 Winston Frank Ponder, David R. Lindberg, Juliet Mary Ponder, 2019-11-18 Molluscs comprise the second largest phylum of animals after arthropods occurring in virtually all habitats. Some are commercially important, a few are pests, and some carry diseases, while many non-marine molluscs are threatened by human impacts which have resulted in more extinctions than all tetrapod vertebrates combined. This book and its companion volume provide the first comprehensive account of the Mollusca in decades. Illustrated with hundreds of colour figures, it reviews molluscan biology, genomics, anatomy, physiology, fossil history, phylogeny, and classification. This volume includes general chapters drawn from extensive and diverse literature on the anatomy and physiology of their structure, movement, reproduction, feeding, digestion, excretion, respiration, nervous system, and sense organs. Other chapters review the natural history, including ecology of molluscs, their interactions with humans, and assess research on the group. Key features of both volumes: up-to-date treatment with an extensive bibliography; thoroughly examines the current understanding of molluscan anatomy, physiology, and development; reviews fossil history and phylogenetics; overviews ecology and economic values; and summarises research activity and suggests future directions for investigation. Winston F. Ponder was a Principal Research Scientist at The Australian Museum in Sydney where he is currently a Research Fellow. He has published extensively over the last 55 years on the systematics, evolution, biology, and conservation of marine and freshwater molluscs, as well as supervised post-graduate students and run university courses. David R. Lindberg is former Chair of the Department of Integrative Biology, Director of the Museum of Paleontology, and Chair of the Berkeley Natural History Museums, all at the University of California. He has conducted research on the evolutionary history of marine organisms and their habitats on the rocky shores of the Pacific Rim for more than 40 years. The numerous elegant and interpretive illustrations were produced by Juliet Ponder.

The Mollusca A. S. Tompa, N. H. Verdonk, J. A. M. van den Biggelaar, 1984 The Mollusca A. S. Tompa, N. H. Verdonk, J. A. M. van den Biggelaar, 1984 The Biology of the Mollusca R. D. Purchon, 2013-10-22. Reviews the most important literature on the functional morphology and natural history of molluscs over a period of half a century from 1925 to the present day and draws extensively upon authoritative papers published mostly in the English language in a large number of international journals during this period. By these means it is hoped to provide an anthology of what is most interesting in the literature in a number of selected topics. Appendices give some practical assistance for the dissection of selected examples. **Molluscan Reproduction** Norman William Runham, 1996 **The Mollusca: Reproduction**, 1983

Reproduction A. S. Tompa, 2013-10-22. The Mollusca Volume 7: Reproduction presents the significant features of reproduction for one of the significant major molluscan groups. This book reviews the reproductive biology of land snails, which offers the basis for making fascinating comparisons with other terrestrial groups in illustrating how evolutionary various groups solved their common problem of laying eggs. Organized into six chapters, this volume begins with an overview

of the reproductive biology of prosobranch gastropods This text then provides a comparative morphology of land snail reproductive anatomy Other chapters consider the endocrine control of the female reproductive activity of *Lymnaea stagnalis* This book discusses as well the transition in intraspecific and interspecific sexuality The final chapter deals with cephalopod reproductive biology This book is a valuable resource for readers who are in need of more appropriate animal systems for solving research problems pertaining to general reproduction cytology sex determination biochemistry gamete biology neuroendocrinology and evolutionary biology
