**Key Notes on Plastic Surgery** Adrian Richards, 2008-04-15 This is the new edition of the concise but comprehensive handbook that should be owned by all surgical trainees specialising in plastic surgery. Taking a pithy systematic approach, Key Notes on Plastic Surgery offers the latest developments within the field in bullet point form and includes key papers for viva voces. It is informed by the current FRCS Plast curriculum, making it ideal preparation for the UK exit examination or equivalent international board exam. Key features include: Full coverage of the entire scope of plastic surgery; Clearly divided into 10 sections with logical subheadings for easy fact finding; Brand new chapter on ethics and the law, a compulsory component of the oral examination; Illustrations outlining key surgical procedures and relevant anatomy; Fully revised to include all the latest clinical guidelines. Key Notes on Plastic Surgery is the perfect rapid reference tool for trainees in plastic surgery and dermatologic surgery who require quick accurate answers.

**Plastic and Reconstructive Surgery** Henk Giele, Oliver Cassell, 2008 Plastic and Reconstructive Surgery has been designed to provide succinct information to plastic surgeons of all levels of experience and trainees in partner specialties. The layout is contemporary with the concise information laid out in a readable style. There are descriptions of important operations and techniques with space to add the reader's own notes. It provides an up to date record of current practice for each reader in a compact and easily transportable format. Uniquely for this class of book, there are over one hundred and fifty illustrations conveying key anatomical points and operative detail. This is ideal either as a refresher or to revise essential facts. For medical students with a short attachment to and junior doctors in plastic surgery, this book will provide all the information they will need to know, including all relevant aspects related to the surgical syllabus on which they may be examined. In addition, there is practical information on the emergency care of plastic surgery and burns patients. There is comprehensive advice for the ward management of patients both pre and post surgery. For a specialist trainee, the book acts as the ideal revision text covering the whole field of plastic surgery. It has been designed to act as a summary of the important points examined in the plastic surgery FRCS exam. For a consultant, there are easily accessible facts, particularly on staging and survival data, which allows them to keep abreast of the current level of knowledge of their juniors. There are enlarged sections on hand surgery and lower limb trauma relevant to all orthopaedic trainees. The flap section is also expanded and relevant to a variety of specialties.
