Dynamic systems theory and embodiment in psychotherapy research. A new look at process and outcome Sergio Salvatore, Wolfgang Tschacher, Omar Carlo Gioacchino Gelo, Sabine C Koch, 2016-04-11 In an attempt to cease from reducing the world and its emergent phenomena to linear modeling and analytic dissection Dynamic Systems Theories DST and Embodiment theories and methods aim at accounting for the complex dynamic and non linear phenomena that we constantly deal with in psychology For instance DST and Embodiment can enrich psychology s understanding of the communicative process both in clinical and non clinical settings In psychotherapy an important amount of research has shown that next to other ingredients the therapeutic relationship is the most important active factor contributing to psychotherapy outcome These findings give communication a central role in the psychotherapy process In the traditional view the underlying model of understanding psychotherapy processes is that of a number of components summatively coming together enabling us to make a linear causal prediction Yet communication is inherently dynamic A shift to viewing the communication process in psychotherapy as a field dynamic phenomenon helps us to take into account nonlinear phenomena such as feedback processes within and between persons We thus propose an embodied enactive dynamic systems view as a new theoretical and methodological perspective that can more realistically capture what happens among and between two persons in psychotherapy This view reaches beyond the current narrow model of psychotherapy research DST and Embodied Enactive Approaches can offer solutions to the loss of non linear phenomena the complex dynamics of reality and the holistic level of analysis DST and Embodied Enactive Approaches have developed not in a single discipline but in a joined movement based on various fields such as physics biology robotics anthropology philosophy linguistics neuroscience and psychology and have only recently entered clinical theorizing The two new paradigms have already triggered a rethinking of the therapeutic exchange by recognizing the embodied nature of psychological and communicative phenomena Their integration opens up a promising scenario in the field of psychotherapy research developing new profoundly transdisciplinary theoretical concepts methodologies and standards of knowledge The notion of

field dynamics enables us to account for the role of the communicational context in the regulation of intra psychological processes while at the same time avoiding the pitfalls of an ontologization of the hierarchy of systemic organization Moreover the new approach implements methodological strategies that can transcend the conventional opposition between idiographic and nomothetic sciences Sociology of Sport and Social Theory Earl Smith,2010 Sociology of Sport and Social Theory presents current research perspectives from major sport scholars and leading sociologists regarding issues germane to the sociology of sport while addressing traditional and contemporary sociological theories **The Systems Approach to**

Problem Solving George K. Chacko,1989-10-06 Drawing upon his considerable practical experience in the field and his highly regarded theoretical work Chacko explores the use of systems science in solving complex problems in a variety of contexts The author operationally defines the characteristics of problems that require a systems approach presents his own step by step systems approach protocol and takes the reader through 25 applications of the protocol to actual events Ranging from global strategy decision making to corporate sales planning the case examples clearly demonstrate the ways in which the systems approach can be an effective operational tool for managers and policymakers involved in decision making situations characterized by difficulty and uncertainty The case examples included fall into two major categories missions and markets In the first group Chacko analyzes problems such as the U S response to Soviet threats during the Cuban missile crisis the decision to attempt to achieve a nuclear force reduction agreement and the questions of where and how to base the nation s strategic air forces Among the market applications examined are Texas Instruments decision to develop manufacture and market semiconductor devices a corporate strategy to increase market share by 30 percent and the evaluation of electronic alternatives to paper based communications Throughout Chacko pays particular attention to developing a workable approach to problem solving in an atmosphere of complexity and uncertainty His work will be especially useful to marketing and R D professionals as well as to students of systems science and analysis **Creative Habitat Restoration**
