Analysis of Flame Retardancy In Polymer Science Henri Vahabi,Mohammad Reza Saeb,Julio Malucelli,2022-03-10

Analysis of Flame Retardancy in Polymer Science is a scientific practical book that is conceptualized designed and written for students

early career researchers and junior engineers to explain the basic principles of fire analysis characterization methods

methodologies from flammability ignition and fire spread to forced convection and related analyses and to elucidate the mechanisms underlying flame retardancy in both gas and condensed phases followed by correlation between laboratory and real scale fire analyses as well as fire analysis from an industrial standpoint

This book is also an indispensable resource for identifying and mounting the latest achievements in fire analysis characterization methods to frame the effects of fire evaluation strategies to be utilized for research and development

The book also gives a broad description of fire analysis related to different standards and regulations for different applications in different geographic zones

Includes the background fundamental and modern features of techniques of characterization of fire and flame behavior

Provides an overview of the major techniques used in fire analysis of flame retardant polymers

Characterizes different types of materials at small bench and real life scale

Offers a comprehensive overview of fire behavior and testing and associated toxicity issues

Integrates the scientific technical standard regulation and industrial aspects of fire analysis into a book for future developments in the field
