**Demonstrating Your Competence in Reproductive Health** Julian Jenkins, 2005. APPRAISAL AND REVALIDATION SERIES. The Appraisal and Revalidation Series helps doctors demonstrate their competence to the standard expected by the General Medical Council and to the standard expected if they are recognised as having special clinical interests. It helps doctors gather evidence of their performance for appraisal and revalidation portfolios. Revalidation will change the emphasis of regulation of doctors with an interest in reproductive medicine away from the qualifications of MRCOG or DRCOG towards regular assessment of a doctor's competence to practise and it will be incumbent upon the individual doctors, whether in training or in substantive posts in primary or secondary care, to reflect on their work and to demonstrate expertise within their special clinical interests. This book will help to alleviate anxieties by removing the fear of the unknown through a series of concise chapters covering the crucial clinical areas in reproductive healthcare. I commend the excellent practical advice on how to accumulate revalidation data by using practical examples based on cycles of evidence. I envisage that many of us involved in the care of women will refer to this book time and time again. It is an excellent contribution that will help doctors immensely in their preparation for the requirements of revalidation on all aspects of reproductive health. **Homœopathic Journal of Obstetrics, Gynaecology and Pediatrics**, 1891. *Models of Care in Women's Health* Tahir Mahmood, Allan Templeton, Charnjit Dhillon, 2009-06-01.

This book helps to improve the quality of the care in gynaecological practice. Improvement is driven by clinical effectiveness and increasing patient demands, and for each area of practice described, this book outlines the service organization needed to achieve this improvement. The goal is to help clinicians take responsibility for developing services that meet the needs of their patients as well as managing their individual medical conditions. The book demonstrates that much can be achieved.

within current resources and without the need for major additional expense Different approaches are demonstrated but the key issue is the patient pathway with the underlying philosophy of continuous improvement in quality Trainees clinicians managers and commissioners of services in obstetrics and gynaecology will find this book of immense practical value
