

- **Stocking:**

At the fish farms and hatcheries, the young carp would have been placed in ponds or tanks prepared for their introduction. These ponds would have been carefully managed to ensure suitable water conditions and an adequate food supply for the young fish.

- **Monitoring:**

Once introduced, monitoring of carp population is necessary to track their growth, reproduction and any potential impacts on the local ecosystems. (Khan, m. N., 2016)

Handbook of Fish Biology and Fisheries Paul J. B. Hart,John D. Reynolds,2008-04-15 Recent decades have witnessed strong declines in fish stocks around the globe amid

growing concerns about the impact of fisheries on marine and freshwater biodiversity Fisheries biologists and managers are therefore increasingly asking about aspects of ecology behaviour evolution and biodiversity that were traditionally studied by people working in very separate fields This has highlighted the need to work more closely together in order to help ensure future success both in management and conservation The Handbook of Fish Biology and Fisheries has been written by an international team of scientists and practitioners to provide an overview of the biology of freshwater and marine fish species together with the science that supports fisheries management and conservation This volume subtitled Fish Biology reviews a broad variety of topics from evolutionary relationships and global biogeography to physiology recruitment life histories genetics foraging behaviour reproductive behaviour and community ecology The second volume subtitled Fisheries uses much of this information in a wide ranging review of fisheries biology including methods of capture marketing economics stock assessment forecasting ecosystem impacts and conservation Together these books present the state of the art in

ourunderstanding of fish biology and fisheries and will serve asvaluable references for undergraduates and graduates looking for acomprehensive source on a wide variety of topics in fisherieresscience They will also be useful to researchers who needup to date reviews of topics that impinge on their fields anddecision makers who need to appreciate the scientific backgroundfor management and conservation of aquatic ecosystems To order volume I go to the box in the top right hand corner Alternatively to order volume II go to <http://www.blackwellpublishing.com/book.asp?ref=063206482X> or toorder the 2 volume set go to <http://www.blackwellpublishing.com/book.asp?ref=0632064838> Provides a unique overview of the study of fish biology andecology and the assessment and management of fish populations andecosystems The first volume concentrates on aspects of fish biology andecology both at the individual and population levels whilst thesecond volume addresses the assessment and management of fishpopulations and ecosystems Written by an international team of expert scientists andpractitioners An invaluable reference tool for both students researchers andpractitioners working in the fields of fish biology andfisheries
