*Barriers to Cultural Change in Organisations* Claudia Wohlatz, 2014-11-06 Essay from the year 2014 in the subject Business economics Business Management Corporate Governance grade 1.0 University of Applied Sciences Riedlingen language English abstract The intent of this essay is to describe the concept of cultural change especially focussing on typical barriers to cultural change in organisations and how they can be overcome Additionally these barriers and possible solutions will be illustrated using an example from the workplace company sports club etc Often we hear our culture needs to be changed But why is cultural change necessary which difficulties are met and how can it be overcome Nowadays we live and work in an environment of discontinuous change processes caused by varied reasons like for example external market influences as in different strategies of competitors changes of demands and structures of important customers or benchmark results but also for internal company influences This means a cultural change is necessary since without cultural change it is not possible to achieve successful strategic change However a cultural change is always combined with fears and doubts of the individual People resist change

because the work culture drives them or allows them to Therefore it is crucial and important to know which barriers to cultural change can occur and what has to be considered and carried out to make cultural change successful In the first chapter of this essay this topic is introduced but it is also supposed to rationalise why cultural change affects and how cultural changes can be handled The second chapter describes what organisational culture and cultural change in organisation means Furthermore the focus will be on defining the barriers to cultural changes and how they can be solved The definition of the barriers and success factors will be the base for further discussion in chapter 3 using an example from a company experience The essay will finish with a conclusion in chapter 4

Strategic Culture and Violent Non-State Actors Edward D. Last, 2020-07-12 This book applies strategic culture concepts to violent non state actors VNSAs in a comparative analysis In recent years Al Qaida in the Islamic Maghreb AQIM has become notorious for kidnapping Western hostages in north western Africa and for its role in the short lived Islamist takeover of Mali The group formerly known as the Salafist Group for Preaching and Combat rebranded itself as an Al Qaida franchise in 2007 leading to speculation of a change from its Algeria centric agenda to an anti Western one This study compares and contrasts the ideas and behaviour of these two groups using a strategic cultural approach and finds that despite some commonalities AQIM has a distinct strategic culture from Al Qaida central thereby debunking the notion of Al Qaida as a monolithic movement This is the first comparative analysis of violent non state actors to employ a strategic cultural approach and the first such study on AQIM While strategic culture has traditionally been applied to states this work adds to the emerging literature applying such approaches to non state armed groups and employs a novel conception of strategic culture consisting of narratives and practices This book will be of much interest to students of strategic culture political violence Middle Eastern politics and Security Studies in general
