Rise and Fall of Strategic Planning Henry Mintzberg, 1994-01-31

In this definitive and revealing history, Henry Mintzberg, the iconoclastic former president of the Strategic Management Society, unmasks the press that has mesmerized so many organizations since 1965 strategic planning. One of our most brilliant and original management thinkers, Mintzberg concludes that the term is an oxymoron that strategy cannot be planned because planning is about analysis and strategy is about synthesis. That is why he asserts the process has failed so often and so dramatically. Mintzberg traces the origins and history of strategic planning through its prominence and subsequent fall. He argues that we must reconceive the process by which strategies are created by emphasizing informal learning and personal vision and the roles that can be played by planners. Mintzberg proposes new and unusual definitions of planning and strategy and examines in novel and insightful ways the various models of strategic planning and the evidence of why they failed. Reviewing the so-called pitfalls of planning, he shows how the process itself can destroy commitment, narrow a company's vision, discourage change and breed an atmosphere of politics. In a harsh critique of many sacred cows, he describes three basic fallacies of the process that discontinuities can be predicted, that strategists can be detached from the operations of the organization and that the process of strategy making itself can be formalized. Mintzberg devotes a substantial section to the new role for planning plans and planners not inside the strategy making process but in support of it, providing some of its inputs and sometimes programming.

its outputs as well as encouraging strategic thinking in general This book is required reading for anyone in an organization who is influenced by the planning or the strategy making processes **Strategy Journeys** David Booth,2016-09-14 Strategy Journeys starts from the premise that strategic planning suffers from a bad press it can be seen as complex technical remote from the day to day reality of an organisation undertaken by an elite specialist executive group producing threatening changes whose rationale is barely understood or perhaps worse still having no worthwhile impact at all For many senior executives strategic planning is too daunting a task which is why they often seek help from those with the expertise to guide the process they have a severe lack of confidence in their own ability to design plan and implement such an important and major project Yet organisations have never had greater need for a flexible resilient and engaging approach to strategic planning than now How do those leading an organisation know where to start what approach to take and how to go about the process of strategic planning David Booth aims to help them by demystifying the concept and propounding a first principles approach to developing a strategic plan within the context of the individual organisation and with the flexibility to adapt the process to focus on what really matters He suggests the key questions that should be asked when considering embarking on a strategic planning journey to help design and guide the process **Strategic Planning Simplified** Stephen Haines,2007
