**Ultrasonic Materials Characterization** Harold Berger, Melvin Linzer, National Measurement Laboratory (U.S.), 1980      **Engineering ,1880      Fracture and Strength of Solids VI** Ichsan Setya Putra, Djoko Suharto, 2006      **Thermoplastic Processing of Structural Metallic Materials** Serhii Sheyko, Yurii Belokon, Oleksii Hrechanyi, Tetyana Vasilchenko, 2024-10-19 This book discusses the scientific framework of thermoplastic deformation of

structural metallic materials in particular dual phase steels and intermetallic alloys emphasizing the attainment of desired alloy structures and properties through enhanced production techniques. By strategically manipulating the stress strain state a more uniform deformation is achieved thereby fostering structural and property homogeneity. A novel experimental theoretical approach is presented for correlating the stress strain state with grain size and metal flow stress. Through extensive experimentation flow curve dependencies and deformation resistance under varying temperature velocity conditions are meticulously examined facilitating their integration into specialized software platforms. Analytical formulations derived from experimental data enable the calculation of deformation resistance for special alloys and the establishment of optimal thermoplastic processing parameters. Aimed at scientific and technical professionals as well as experts in metallurgy and materials science this book offers invaluable insights into the advancement of alloy processing methodologies.
