Strength Or Accuracy Credit Abignment In Learning Clabifier Systems:

Strength or Accuracy: Credit Assignment in Learning Classifier Systems Tim Kovacs,2012-12-06 Classifier systems are an intriguing approach to a broad range of machine learning problems based on automated generation and evaluation of condition action rules Inreinforcement learning tasks they simultaneously address the two major problems of learning a policy and generalising over it and re lated objects such as value functions Despite over 20 years of research however classifier systems have met with mixed success for reasons which were often unclear Finally in 1995 Stewart Wilson claimed a long awaited breakthrough with his XCS system which differs from earlier classifier sys tems in a number of respects the most significant of which is the way in which it calculates the value of rules for use by the rule generation system Specifically XCS like most classifiersystems employs a genetic algorithm for rule generation and the way in whichit calculates rule fitness differsfrom earlier systems Wilson described XCS as an accuracy based classifiersystem and earlier systems as strength based The two differin that in strength based systems the fitness of a rule is proportional to the return reward payoff it receives whereas in XCS it is a function of the accuracy with which return is predicted The difference is thus one of credit assignment that is of how a rule s contribution to the system s performance is estimated XCS is a Q learning system in fact it is a proper generalisation of tabular Q learning in which rules aggregate states and actions In XCS as in other Q learners Q valuesare used to weightaction selection

Learning Classifier Systems Pier Luca Lanzi,2003-11-24 This book constitutes the refereed proceedings of the 5th International Workshop on Learning Classifier Systems IWLCS 2003 held in Granada Spain in September 2003 in conjunction with PPSN VII The 10 revised full papers presented together with a comprehensive bibliography on learning classifier systems were carefully reviewed and selected during two rounds of refereeing and improvement All relevant issues in the area are addressed

Foundations of Learning Classifier Systems Larry Bull,2005-07-22 This volume brings together recent theoretical work in Learning Classifier Systems LCS which is a Machine Learning technique combining Genetic Algorithms and Reinforcement Learning It includes self contained background chapters on related fields reinforcement learning and evolutionary computation tailored for a classifier systems audience and written by acknowledged authorities in their area as well as a relevant historical original work by John Holland

Learning Classifier Systems Pier L. Lanzi,Wolfgang Stolzmann,Stewart W. Wilson,2003-06-26 Learning Classifier Systems LCS are a machine learning paradigm introduced by John Holland in 1976 They are rule based systems in which learning is viewed as a process of ongoing adaptation to a partially unknown environment through genetic algorithms and temporal difference learning This book provides a unique survey of the current state of the art of LCS and highlights some of the most promising research directions The first part presents various views of leading people on what learning classifier systems are The second part is devoted to advanced topics of current interest including alternative representations methods for evaluating rule utility and extensions to existing classifier system models The final part is dedicated to promising applications in areas like data

mining medical data analysis economic trading agents aircraft maneuvering and autonomous robotics An appendix comprising 467 entries provides a comprehensive LCS bibliography *From Animals to Animats 4* Pattie Maes,1996 From Animals to Animats 4 brings together the latest research at the frontier of an exciting new approach to understanding intelligence *Artificial Life* Christopher G. Langton,1997 This book brings together a series of overview articles that appeared in the first three issues of the groundbreaking journal Artificial Life *Mathematical Reviews* ,2005
