**Stress in Teachers** Jack Dunham, Ved Prakash Varma, 1998-08-10 Examines the stress in teaching multidisciplinary concept broad enough to include physiological psychological organisational and legal perspectives The editors see stress in teaching as an interactionist concept a complex and sometimes precarious balance between perceived work pressures coping strategies and stress reactions The early chapters in the book reflect this view and make contributions to understanding the causes and costs of stress in teaching The authors of these chapters come collectively to the conclusion that there is an alarmingly low level of job satisfaction in teaching and that turnover intentions appear to be on the increase This pessimistic view is challenged in later chapters by professionals working in the field of stress management These contributions highlight the danger of focusing stress research and management These contributions highlight the danger of focusing stress research and management strategies on the individual rather than the organization and report the authors' hands-on knowledge of teacher support teams and workshop and whole school approaches to diminishing the causes and costs of teacher stress and improving training and career development The concluding chapters demonstrate the editors' belief that useful insights for workers in the education service can be gained from studies of workplace stress in other occupations
