**The Musical Year-book of the United States** ,1893      The National Union Catalog ,1968      **Chamber Arrangements of Beethoven's Symphonies, Part 3** Ludwig van Beethoven,2020-01-01 This volume represents two important aspects of early nineteenth century taste in chamber music a predilection for mixed groupings including winds and strings and a preference for larger groupings including nonets The sheer number of such works composed along with data from publishing catalogs and concert programs is evidence of the contemporary taste for varied chamber music The present volume gives a selection of three large scale chamber arrangements of Beethoven s symphonies Michael Gotthard Fischer s arrangement of the sixth symphony for string sextet provides an example of this less common format The nonet arrangement of the second symphony for flute two horns two violins two violas cello and bass by Ferdinand Ries shows the flexibility of performance forces in this repertoire as well as the publishers and composers desires to capitalize on their popularity given that this arrangement can be performed with or without the addition of winds The arrangement of the fourth symphony by William Watts stands between the sextet and nonet arrangements noted above in its combination of one flute with six strings
