Strategy Of Pollution Control:

Modern Technology Of Waste Management: Pollution Control, Recycling, Treatment & Utilization NIIR Board, 2003-02-14

Waste management is the collection transport processing or disposal managing and monitoring of waste materials. The term usually relates to materials produced by human activity and the process is generally undertaken to reduce their effect on health the environment or aesthetics. Waste management is a distinct practice from resource recovery which focuses on delaying the rate of consumption of natural resources. The management of wastes treats all materials as a single class whether solid liquid gaseous or radioactive substances and tries to reduce the harmful environmental impacts of each through different methods. Rapid industrialization last few decades have led to the depletion of pollution of precious natural resources in India depletes and pollutes resources continuously. Further the rapid industrial developments have led to the generation of huge quantities of hazardous wastes which have further aggravated the environmental problems in the country by depleting and polluting natural resources. In fact man today is caught in the vicious circle of increasing wants declining resources and increasing waste being generated by the industries and municipalities is posing a problem of enormous dimensions. The domestic and industrial effluents are contributing in enhancing this problem. It might become the biggest problem if it is not dealt with immediately. Therefore rational and sustainable utilization of natural resources and its protection from toxic releases is vital for sustainable socioeconomic development. Hazardous waste management is a new concept for most of the Asian countries including India. The utilization of resources and generation of waste is for beyond the limit that the biosphere was made to carry. This book majorly deals with industrial waste industrial waste water technology modern technologies for water pollution control water recycle product recovery air pollution control environmental management system EMS surface active agents and contamination of water physical methods for the treatment of organic acid bearing wastes realities of waste cyanide treatment in India biological treatment of aqueous wastes plastics and generated wastes alginate industry waste a source of biogas acid charred waste as a resource material for highly active adsorbent. We have made a sincere effort to bring out this book which helps in minimizing the problem. For the conservation of our environment and sustainable development we have tried to bring about the solution. This book is a careful attempt in bringing together some selected articles from both entrepreneurs and specialist on all that is possible in the field of waste management.
