Interface Between The Psychodynamic And Behavioral Therapies:

The Interface Between the Psychodynamic and Behavioral Therapies Judd Marmor, 2012-12-06 It is sobering to reflect that it has been nearly fifty years since Thomas French's article on the Interrelations between Psychoanalysis and the Experimental Work of Pavlov representing the first psychoanalyst to bridge the gap between the theories of conditioning was published. In his paper French clearly delineated the manner and directions in which these two points of view might enrich each other. Regrettably his openness to new ideas has not been characteristic of most schools of psychiatry thought which have tended instead to develop an unfortunate degree of insularity. This has occurred despite the obvious reality that the bio-social psychological nature of man is such that no one theory or discipline is likely in the foreseeable future to explain much less predict all of the complexities of human behavior. All too often disputing theoreticians like the fabled blind men describing the elephant assume that the whole is just a gigantic magnification of the parts with which they are in contact. When treatment strategies are extrapolated from such narrow views more often than not they fail to achieve the parsimony of effort, the breadth of application and the maximum of efficiency that one would hope for. In our opinion it is impossible adequately to conceptualize personality development, symptom formation or responses to psychotherapy without taking into consideration theories of conflict as well as those of learning. **Journal of Contemporary Psychotherapy**, 1984

Integrative and Eclectic Therapy Windy Dryden, 1992 This text reports and reflects on the growing interest in and activity of integrative eclectic approaches to therapy. Topics covered include some specific therapeutic arenas or modalities, the research literature and the training of integrative therapists. *American Journal of Psychotherapy*, 1947 *A Handbook of Integrative Psychotherapies for Children and Adolescents* Sebastiano Santostefano, 1998 This is a comprehensive textbook on child and adolescent psychotherapy. It is suitable for students at graduate, postgraduate and advanced undergraduate levels. It will also serve to inform experienced practitioners about the latest developments in the field. Bringing together concepts and methods from psychodynamic, behavioural, cognitive and developmental perspectives it provides an integrative conceptual model and therapeutic approach for conducting psychotherapy with children and adolescents troubled by a wide range of psychological and cognitive difficulties including ADHD and learning disorders. The integrated model and rationale described seeks to stimulate students and experienced clinicians alike to step out of the present day conceptually segregated world of psychotherapy and into a world of psychotherapy unbounded by narrow theoretical orientations. Annual Review of Behavior Therapy, 1979 Consists of articles reprinted from various journals. **The American Journal of Psychiatry**, 1985-05 The Integration of Psychotherapies Alvin R. Mahler, 1989 This working guide to how and why to go about the integration of psychotherapies is useful for psychotherapists of all approaches, professions and degrees of experience, most of whom are implicitly or explicitly engaged in some kind of integration. Each of the first six chapters describes different ways of integrating psychotherapies, discusses whether it is workable or unworkable and outlines its consequences for the field as a
