Holt Science and Technology 2002 Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2002      **Hyperspectral Imaging for Fine to Medium Scale Applications in Environmental Sciences** Michael Vohland, András Jung, 2021-05-14  
The aim of the Special Issue Hyperspectral Imaging for Fine to Medium Scale Applications in Environmental Sciences was to present a selection of innovative studies using hyperspectral imaging HSI in different thematic fields. This intention reflects the technical developments in the last three decades which have brought the capacity of HSI to provide spectrally, spatially and temporally detailed data favoured by e.g. hyperspectral snapshot technologies, miniaturized hyperspectral sensors and hyperspectral microscopy imaging. The present book comprises a suite of papers in various fields of environmental sciences: geology, mineral exploration, digital soil mapping, mapping and characterization of vegetation and sensing of water bodies including under ice and underwater applications. In addition, there are two rather methodically, technically oriented contributions dealing with the optimized processing of UAV data and on the design and test of a multi channel optical receiver for ground based applications. All in all, this compilation documents that HSI is a multi faceted research topic and will remain so in the future.

Singer, 2012-04-27  
Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents and helpful charts, graphs, photographs and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at [http://people.hofstra.edu/alan\\_j\\_singer](http://people.hofstra.edu/alan_j_singer). The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

of how academia as a whole interacts with civilization's broadest movements.
