**The Island of Dr. Moreau** Herbert George Wells, Summit Classic Press, 2014-08-07 This premium quality large print volume includes H G Wells science fiction classic in a freshly edited and newly typeset edition with a 6x9 page size printed on heavyweight bright white paper with a fully laminated cover featuring an original full color design. Also includes an introductory biographical sketch discussing Wells' life work and continuing literary significance. In this 1896 science fiction classic a shipwrecked Englishman named Edward Prendick is rescued from the sea and subsequently abandoned on a secluded island which he soon finds is owned by a once eminent British physiologist named Dr Moreau. Shunned when his gruesome experiments with vivisection were exposed, Moreau continued his experiments on his island with horrific results, creating animals surgically altered to mimic human beings. Typical of Wells' major science fiction works, *The Island of Dr Moreau* reflects a degree of ambivalence about scientific progress and looks at the possible effects of science and technology applied without restraint. Much like *The Invisible Man*, it can be viewed as a sort of cautionary tale warning that science and technology when pursued and applied outside a structure of societal norms and ethical restraints can lead to disastrous consequences. In addition, it calls into question the unrestricted use of vivisection which then meant surgical experiments on live animals often without anesthesia and raises questions of cruelty, pain, man's relationship with animals and the nature of humanity itself.

Herbert George Wells (1866-1946) was born to shopkeepers, previously employed as domestic servants. When an injury ended his father's income as a professional cricketer, Wells' parents apprenticed him to a draper, but he was dismissed after a short time and subsequently became a pupil teacher in a system where older students helped teach younger students. Despite having little formal education, Wells a voracious reader won a scholarship to the Normal School of Science in London where he completed courses in biology and physics but left the school in 1887 after failing geology and losing his scholarship. Best known today for his science fiction works, Wells' first published book was a biology textbook in 1893. With the publication of *The Time Machine* in 1895, Wells began a long and successful writing career. The next several years saw the publication of *The War of the Worlds*, *The Invisible Man*, *The*
