The Development Of Dialectical Operations:

The Development of Dialectical Operations Klaus F. Riegel, 1975 **THE DEVELOPMENT OF DIALECTICAL OPERATIONS- PAPERS PRESENTED AT A WORKSHOP- 2 PARTS.** , Foundations of Dialectical Psychology Klaus F. Riegel, 2013-10-22 Foundations of Dialectical Psychology is a compilation of the writings of Klaus F Riegel on dialectical psychology The book presents chapters discussing such topics as the dialectics of human development history of dialectical psychology temporal organization of dialogues and the analysis of the concept of crisis and its underlying philosophical model and ideology Psychologists and students will find the book invaluable Rethinking Cultural-Historical Theory Manolis Dafermos, 2018-05-17 This book is an exploration of science in the making It offers readers the opportunity to critically reflect on the process of development of Vygotsky's research program from the perspective of dialectics focusing on the dramatic process of building and rebuilding cultural historical theory Vygotsky's creative and dramatic journey is no less important than the concrete results of his research An epistemological and historical investigation of the formulation of cultural historical theory sheds light on the process of knowledge production and reveals hidden dimensions of creativity in science Psychology Library Editions: Child Development Various, 2021-12-02 Psychology Library Editions Child Development 20 Volume set brings together a diverse number of titles across many areas of developmental psychology from children's play to language development The series of previously out of print titles originally published between 1930 and 1993 with the majority from the 70s and 80s includes contributions from many respected authors in the field and charts the progression of the field over this time **From "Modern" to "Postmodern" Psychology: Is There a Way Past?** Barbara Hanfstingl, Timo Gnambs, Peter Adriaan Edelsbrunner, Jana Uher, Ulrich Dettweiler, 2023-03-31 *The Personal Experience of Time* B. Gorman, 2013-03-09 The fundamental nature of human time experience has concerned artists poets philosophers and scientists throughout the ages Any consideration of human action requires awareness of its temporal aspects However simply to view time in the same units and dimensions as the physicist employs in describing events robs personal time of its lived quality The use of physical time concepts in the description of human events is often artificial and misleading It fails to account for the facts that human time estimates rarely match clock and calendar time that societies and individuals demonstrate vast differences in their constructions and uses of time and that temporal perceptions and attitudes change within an individual both during a single day and throughout his life span The present volume does not view time as something that is sensed in the same way that one would sense or perceive spatial or sensory stimuli Rather it views time as a complex set of personally experienced cognitive constructs used by individuals and cultures to account for the order the duration and the organization of events The authors in this book take a strong departure from earlier psychophysical studies of a time sense and address themselves to the uses and elaborations of time concepts in personal and social functioning The Development of Reflective Judgment and Formal Operational Thinking in Adolescents and Young Adults Patricia

Margaret Brown King,1977 Life-Span Developmental Psychology Nancy Datan,Hayne W. Reese,2013-09-03 Life Span Developmental Psychology Dialectical Perspectives on Experimental Research is a compilation of papers that deals with the dialectical perspective focusing on the developmental process of the individual s interaction with the environment Part 1 discusses the theoretical issues of psychological theorists such as Piaget and Kaplan The text includes topics such as the dialectics of time and post Newtonian metatheory for psychologists One paper discusses the dialectic method and theory in the work of psychology as social proof structures particularly when systems of action cause conflict with systems of thought The text analyzes research versus theory through the Wundt Titchener Laboratory example Another paper addresses the status of dialectics in developmental psychology using the approach of theoretical orientation versus the scientific method Part 2 presents research applications covering topics such as the phenomenological and a behavioral approach to remembering as well as remembering in empiricism Another paper addresses the dialectical perspectives of discriminative learning and transfer that includes both theory and research done on discriminative performance This book will prove valuable for psychologists behavioral therapists and researchers and students in behavioral psychology *Psychological Development From Infancy* Marc H. Bornstein,William Kessen,2017-12-12 Originally published in 1979 this volume represented a unique attempt to connect the usually separated fields of infancy studies and studies of older children In each chapter eminent research workers attempt to cross the theoretical empirical and methodological barriers that had traditionally separated the study of preverbal infants from the study of verbal children and adults at the time These completely new and original contributions traced the developmental links between birth and conversation within three major categories perceptual cognitive and language development Although the chapters range from reports of well defined research areas to theoretical propositions the aim throughout was to relate the events of the first year of life to the child s later perceptual and cognitive activity This book will still be of interest for all concerned with child development and related areas in that it demonstrates the remarkable range of observations about infants brought under a single guiding set of questions about continuity stability and the sources of change during and after the first year of life **Perspectives in Interactional Psychology** Lawrence Pervin,2013-11-11 An old woman walks slowly up the hill from the store to her house The hill is quite steep and the packages she carries heavy The two ten year olds watching her feel sorry for her and moving toward her ask if they might help carry the packages They easily lift them and with almost no effort bring the shopping bags to the top of the hill After receiving all A s in his first term in college F finds that this term is much harder especially his physics courses in which he is failing He has talked to his professor twice but finds he cannot understand what she is teaching Somehow he thinks if she could only present the material in a different way I could understand it better A month ago as B lay playing quietly in his crib a toy key slipped out of his hand onto the floor Almost immediately he turned his attention to another toy close by which he took up and put into his mouth Yesterday very nearly the same thing happened

except this time as soon as the toy key fell he began to cry loudly forcing me to stop what I was doing and retrieve it for him It seemed in the first case that he forgot it while yesterday even though it was gone out of his sight he still remembered it and wished it back

Approaches to Adult Development Or Close Relationships and Socioeconomic Development Michael L.

Commons, Jack Demick, Carl Goldberg, 1996 This volume is one of the first to concentrate on positive growth and development in a clinical arena rather than loss and pathology In contrast to the general theories and cross sectional studies of existing adult developmental research much of this volume looks at the whole life level of development of adults through case studies The book unites three compatible approaches to the study of adult development The first considers the development of whole life The second approach examines behavior during certain periods in adults lives by combining clinical and developmental stage perspectives The third approach examines periods of life following the work of Erikson Levinson and Vaillant The editors of this volume believe that these three approaches form in their synergy a comprehensive and multifaceted approach to uniquely difficult problems of late adolescence and early adulthood It is the unification of these three approaches that makes this book unique in its field The Origin and Growth of Plato's Logic Wincenty Lutosławski, 1897 *Adult*

Development Michael L. Commons, 1989-08-22 In recent years a number of researchers have begun to question the Piagetian theory that cognitive structural development ends with the adolescent's acquisition of formal operations and have begun to focus on the development of thought in late adolescence and adulthood This volume brings together the work of numerous scholars in cognitive social and perceptual development to explore the nature of postformal thought The contributors represent the diversity of models and approaches that characterize the ongoing research in this area and at the same time act to unify this body of literature within a common framework of analysis Students researchers and practicing psychologists will find here important new insights into the evolution of thought processes throughout the human lifespan A number of the papers present alternative but closely related models of postformal cognition as well as techniques of measuring postformal thought Of special interest is the presentation of data supporting claims that thought represents a stage qualitatively distinct from the transition between hierarchical and formal operations The opening chapter describes Beethoven's cognitive development in late adolescence and adulthood while subsequent essays discuss the modifications of formal structures that develop in the attempt to use formal reasoning in real life problem solving A set of studies that extend the study of postformal thought into the domains of moral thought and social reasoning complete the volume
