Foxcroft,Petr Pyšek,David M. Richardson,Piero Genovesi,2013-11-27 This book is the first comprehensive global review of all aspects of alien plant invasions in protected areas It provides insights into advances in invasion ecology emanating from work in protected areas and the link to locally relevant management support for protected areas The book provides in depth case

studies illuminating interesting and insightful knowledge that can be shared across the global protected area network The book includes the collective understanding of 80 ecologists and managers to extract as much information as possible that will support the long term management of protected areas and the biodiversity and associated ecosystem services they maintain This outstanding volume draws together pretty much all that can be said on this topic ranging from the science through policy to practical action Dr Simon N Stuart IUCN Species Survival Commission UK This important and timely volume addresses two of the most serious problems affecting biodiversity conservation today assessing the extent to which protected areas are impacted by biological invasions and the complex problems of managing these impacts Written by leading specialists it provides a comprehensive overview of the issues and gives detailed examples drawn from protected areas across the world Professor Vernon H Heywood School of Biological Sciences University of Reading UK
