Fundamentals of Electrical Engineering Leonard S. Bobrow,1996 An instructor s manual to accompany the text Fundamentals of Electrical Engineering Second Edition by Leonard S Bobrow This manual includes solutions to problems in the main text as well as additional problems with solutions AI Technology Fumio Mizoguchi,1990 **Instructor's Manual for Fundamentals of Electrical Engineering** Leonard S. Bobrow,1985 **Handbook of VLSI Chip Design and Expert Systems** A. F. Schwarz,1993 Offers a conceptual and methodological understanding of chip design and of the fundamental principles in the computer aided design of VLSI circuits and systems CADCAS The text covers where why and how expert systems are used in subtasks of CADCAS and in the integrated chip design system Subject Guide to Books in Print ,1983 *ECOOP '87. European Conference on Object-Oriented Programming* Jean Bezivin,Jean-Marie Hullot,Pierre Cointe,Henry Lieberman,1987 This volume contains the proceedings of the first European Conference on Object Oriented Programming held in Paris June 15 17 1987 The idea of this annual conference series is to provide a forum for theorists and practitioners interested in the object oriented programming paradigm The contributions cover the following aspects of object oriented programming methodology implementation theory interfaces languages simulation inheritance Readings in Artificial Intelligence and Software Engineering Charles Rich,Richard C. Waters,2014-06-28 Readings in Artificial Intelligence and Software Engineering covers the main techniques and application of artificial intelligence and software engineering The ultimate goal of artificial intelligence applied to software engineering is automatic programming Automatic programming would allow a user to simply say what is wanted and have a program produced completely automatically This book is organized into 11 parts encompassing 34 chapters that specifically tackle the topics of deductive synthesis program transformations program verification and programming tutors The opening parts provide an introduction to the key ideas to the deductive approach namely the correspondence between theorems and specifications and between constructive proofs and programs These parts also describes automatic theorem provers whose development has been designed for the programming domain The subsequent parts present generalized program transformation systems the problems involved in using natural language input the features of very high level languages and the advantages of the programming by example system Other parts explore the intelligent assistant approach and the significance and relation of programming knowledge in other programming system The concluding parts focus on the features of the domain knowledge system and the artificial intelligence programming Software engineers and designers and computer programmers as well as researchers in the field of artificial intelligence will find this book invaluable **Progress in Computer-aided VLSI Design: Tools** George Winston Zobrist,1989 These volumes review late 1980s early 1990s state of the art developments in computer aided design and analysis techniques Contributions from researchers and practitioners include discussions of parallel algorithms and fundamental operations in cryptography systolic arrays and pipelined designs **Whitaker's Books in Print** ,1998
