Biodiversity Conservation Charles Perrings, 1994 Eighteen papers report the more policy oriented results of the Biodiversity Programme of the Beijer International Institute of Ecological Economics of the Royal Swedish Academy of Sciences The Programme brought together economists and ecologists to consider where the problem in biodiversity loss really lies what costs it has for society and how it might best be addressed The results show that the problem of biodiversity loss lies less in the erosion of the genetic library than in the effect it has on the range of environmental conditions under which ecosystems can continue to function that loss of biodiversity implies loss of ecosystem resilience and thus poses problems for policy wherever it occurs and that solutions should be sought more in reform of local institutions and local policies than in international institutions and transfer systems established to address the threat to the global genetic library Annotation copyright by Book News Inc Portland OR
