mobile technologies have become widely adopted as sought after tools in the field of education. The prevalence of technology in early childhood education ECE is increasing and teachers both pre service and in service are using best practices to integrate tools effectively to improve teaching and learning within the field. This includes settings such as childcare centers, family childcare and community programs that have both educators and administrators adapting to the use of technology. Therefore it has become critical to research and explore the best practices of technology integration and successful strategies to improve the use of technology in ECE. *The Handbook of Research on Empowering Early Childhood Educators With Technology* examines best practices that focus specifically on those that facilitate the development of competencies in teaching young children birth to age 8 and technology integration. The chapters include information on the foundations of technology in early childhood education, content specific technology applications, developmentally appropriate practices DAP for learners using technology and how to meet diverse learner needs with technology. The target audience for this book is early childhood professionals, teacher educators, pre and in service teachers in early childhood settings, faculty and researchers in the field of education, instructional technologists, childcare and elementary school administrators, early education policy organizations and advocacy groups that are interested in the best practices and successful strategies for implementing technology in ECE.

*Story, Formation, and Culture* Benjamin D. Espinoza, James Riley Estep Jr., Shirley Morgenthaler, 2018-10-15. *Story Formation and Culture* brings together a myriad of scholars, researchers and ministry leaders into conversation about how we can effectively nurture the spirituality of children. Built around the three themes of story formation and culture, this volume blends cutting edge research and insights with attention to how we can bring theory into practice in our ministries with children. The work of children's spiritual formation is often a marginalized component in the church's overall ministry. This volume seeks to equip pastors, leaders and scholars with cutting edge research and practices that effectively strengthen their ministries with children.

**A Head Start on Science** William C. Ritz, 2007-06. For the littlest scientists, the whole wide world can be a laboratory for learning. Nurture their natural curiosity with *A Head Start on Science*, a treasury of 89 hands-on science activities specifically for children ages 3 to 6. The activities are grouped into seven stimulating topic areas: the five senses, weather, physical science, critters, water and water mixture, seeds, and nature walks. Because the activities have been field tested by more than a thousand Head Start teachers over 10 years, you'll find this collection unusually easy to use in a variety of settings, including elementary schools, pre-K programs, and day care. In addition to clear background and a helpful materials list, you get step-by-step procedures and help preparing for comments and questions children may pose. Each activity ends with a reproducible Family Science Connection in both English and Spanish to send home so the whole family can share a learning experience that's both simple and pleasant. Thanks to a focus on the fun of exploration and discovery, children probably won't be the only ones who find these activities irresistible. As Editor Bill Ritz writes in the Introduction, "We hope your own sense of wonder will be heightened as you observe children and as their
