Suburban Eggs:

The New Egg Farm H. Hudson Stoddard, 1899 *The Eastern Screech Owl* Frederick R. Gehlbach, 2009-06 The eastern screech owl widespread over the eastern half of North America and noticeably tolerant of human activity is one of America's most familiar birds Residing naturally in wooded environs with tree cavities this owl lives well in suburbia and can be found nesting in mailboxes porch columns and purple martin houses Based on a twenty five year study biologist Frederick R Gehlbach tells the life story of the eastern screech owl focusing on case studies of suburban and rural study plots in Central Texas This is the first thorough study of major life history behavioral and ecological features of the species Indeed it is the first concurrent comparative study of an urban and a rural population of any New World animal Told in a personal voice the story of these birds will interest all who have not lost touch with their ancestral world However Gehlbach has also included quantitative data and analysis of interest to ecologists wildlife biologists and ornithologists Photographs including color shots of the gray and rufous phases figures and tables provide further detail Gehlbach's investigations have been those of not only an academic ecologist but a suburbanite curious about his natural surroundings The result is a model of research on species population dynamics and adaptation yielding an emerging picture of what the eastern screech owl needs for successful coexistence with human neighbors
