Kathryn Bishop Eckert

Superiors Jewel:

The Sandstone Architecture of the Lake Superior Region Kathryn Bishop Eckert,2000 From 1870 to 1910 the prosperity of the copper and iron mining lumbering and shipping industries of the Lake Superior region created a demand for more substantial buildings In satisfying this demand architects builders and clients preferred local red sandstone They found this stone beautiful colorful durable and fireproof Because it was extracted easily in large blocks and shipped cheaply by water it was economical The red sandstone city halls county courthouses churches schools libraries banks commercial blocks and houses gave the Lake Superior region a distinct identity Kathryn Bishop Eckert studies this region as a built environment and examines the efforts of architects and builders to use local red sandstone Eckert stresses the importance of the building materials as she explores the architectural history of a region whose builders wanted to reflect the local landscape

Clinical Anatomy of the Head J. Lang,2012-12-06 This volume on the clinical anatomy of the neurocranium the orbit and the craniocervical junction is intended to provide a precise and detailed account for the use of neurosurgeons otorhinolaryngologists neuroradiologists and roentgenologists In recent years diagnostic techniques and the scope of surgical intervention have broadened and have become increasingly refined Many procedures are nowadays carried out with the aid of magnifying lenses and operating microscopes which bring diminutive structures into the range of the surgeon's hand and eye This means that an atlas of the clinical anatomy of the head must give the surgeon working with the operating microscope and the diagnostician using sophisticated equipment full details of the morphology relevant to the scope of each specialty It would be a fascinating task to depict all the structures of the orbit and the head from the skull base upwards but any such plan would have required a photoatlas in several volumes For this reason I have confined myself to medical problems of current importance In this volume I have included numerous variations which I have myself encountered so as to underline the diversity of human anatomy A more comprehensive presentation of the findings and the structures of the head will be published in the three volumes of LANZ WACHSMUTH All the dissections illustrated in this book were prepared and photographed by myself
