The Foundations of Linguistic Theory (RLE Linguistics B: Grammar) Nigel Love, 2014-02-03 For Roy Harris the fundamental problem about linguistics is that it has been led astray by the fact that we are capable intellectually of decontextualising our own verbal behaviour A whole interlocking system of doctrines about forms meanings and communication has arisen designed to support the idea that one particular kind of decontextualising analysis is a prerequisite for rather than a retrospective reflection on that behaviour Against this in 13 essays collected here for the first time Harris argues for a fresh start which recognises that we create language as we go both as individuals and as communities just as we create our social structures forms of artistic expression moral values and everything else we call civilisation If Harris s thought can be put in a nutshell it is that all utterances whether written or spoken have to appear in a context and that context is an integral part of the utterance There is no such thing as a contextless utterance **Linguistics Inside Out** George Wolf, Nigel Love, 1997-02-13 Roy Harris s thoroughgoing attack on the presuppositions underpinning the dominant traditions of Western thought about language and his advocacy of a radically reconceived linguistics focused on the idea that the linguistic sign is contextually created and interpreted as a function of the meaningful integration of communicative behaviour have made him one of the most controversial figures in the field today In the essays in this volume Naomi S Baron Bob Borsley Philip Carr David Fleming Rom Harr Anthony Holiday John E Joseph Frederick J Newmeyer David R Olson Trevor Pateman John S ren Pettersson and John R Taylor offer a critical examination of various aspects and implications of Harris s views in reponse to which Harris contributes an article that both engages with his critics and develops some of the major themes of his work **Routledge Library Editions: Linguistics** Various, 2021-12-02 Routledge Library Editions Linguistics brings together as one set mini sets or individual volumes a series of previously out of print classics from a variety of academic imprints With titles ranging from Applied Linguistics and Language Learning to Experimental Psycholinguistics and Sociolinguistics Today International Perspectives this set provides in one place a wealth of important reference sources from a wide range of authors expert in the field **South African Journal of Linguistics**, 1998

American Linguistics in Transition Frederick J. Newmeyer, 2022-06-16 This volume is devoted to a major chapter in the history of linguistics in the United States the period from the 1930s to the 1980s and focuses primarily on the transition from post Bloomfieldian structural linguistics to early generative grammar The first three chapters in the book discuss the rise of structuralism in the 1930s the interplay between American and European structuralism and the publication of Joos s Readings in Linguistics in 1957 Later chapters explore the beginnings of generative grammar and the reaction to it from structural linguists how generativists made their ideas more widely known the response to generativism in Europe and the resistance to the new theory by leading structuralists which continued into the 1980s The final chapter demonstrates that contrary to what has often been claimed generative grammarians were not in fact organizationally dominant in the field in
