The Making Of Statisticians:

The Making of Statisticians J. Gani, 2012-12-06 Like many other scientists I have long been interested in history I enjoy reading about the minutiae of its daily unfolding the coinage food clothes games literature and habits which characterize a people I am carried away by the broad sweep of its major events the wars famines migrations reforms political swings and scientific advances which shape a society I know that historians value autobiographical accounts as part of the basic material from which the stuff of history is distilled this should apply no less to statistical than to political or social history Modern statistics is a relatively young science it was while pondering this fact sometime in 1980 that I realized that many of the pioneers of our field could still be called upon to tell their stories If however biographical material about these eminent statisticians was not gathered then one might lose the chance to gain insight into the origins of many an important statistical development The remarkable experience of these colleagues could not be readily duplicated Fired by these thoughts I took it upon myself to plan the framework of this book In it eminent statisticians probabilists are included under this title would be invited to sketch their lives explain how they had become interested in probability and statistics give an account of their major contributions and possibly hazard some predictions about the future of the subject The Making of Statisticians J. Gani, 1982-08-09

Radermacher,2019-12-28 This book explores official statistics and their social function in modern societies Digitisation and globalisation are creating completely new opportunities and risks a context in which facts can play an enormously important part if they are produced with a quality that makes them credible and purpose specific In order for this to actually happen official statistics must continue to actively pursue the modernisation of their working methods This book is not about the technical and methodological challenges associated with digitisation and globalisation rather it focuses on statistical sociology which scientifically deals with the peculiarities and pitfalls of governing by numbers and assigns statistics a suitable position in the future informational ecosystem Further the book provides a comprehensive overview of modern issues in official statistics embodied in a historical and conceptual framework that endows it with different and innovative

perspectives Central to this work is the quality of statistical information provided by official statistics The implementation of the UN Sustainable Development Goals in the form of indicators is another driving force in the search for answers and is addressed here This book will be of interest to a broad readership The topics of sociology epistemology statistical history and the management of production processes which are important for official statistics and their role in social decision making processes are generally not dealt with in statistics books The book is primary intended for official statisticians but researchers and advanced students in statistics economics sociology and the political sciences will find the book equally stimulating Last but not least it offers a valuable source of reflection for policymakers and stakeholders
