The Manipulator Inscribed:

The Manipulative Mode Ilja Leonard Pfeijffer, Karl A. E. Enenkel, 2017-07-31 This book deals with political propaganda in classical antiquity exploring the contexts, strategies and parameters of a fascinating phenomenon that has often been approached with anachronistic models such as the centrally organized propaganda machines of the 20th century totalitarian regimes or completely ignored. It offers case studies on the archaic period, classical Athens, the Hellenistic kingdoms, the Augustan age and the late Roman empire, and emphasizes concepts such as interaction, integration and horizontal orientation.

Inscribed Landscapes Bruno David, Meredith Wilson, 2002-01-01 Annotation: *Inscribed Landscapes* explores the role of inscription in the social construction of place, power and identity. Bringing together twenty-one scholars across a range of fields primarily archaeology, anthropology and geography, it examines how social codes and hegemonic practices have resulted in the production of particular senses of place, exploring the physical and metaphysical marking of place as a means of accessing social history.

Materia Magica Andrew Wilburn, 2012 Approaches ancient magical practice through archaeology and social history.

The Ancient World Revisited: Material Dimensions of Written Artefacts Marilina Betrò, Michael Friedrich, Cécile Michel, 2024-03-04 Written artefacts are traditionally studied because of their content. Material aspects of these artefacts enrich the study of ancient history in many ways. Eleven case studies in five sections on the ancient world, including the Near East, Egypt, the Mediterranean, China and India, demonstrate the impact of a holistic approach that considers materiality and content alike. Following an introductory sketch of relevant research, the first section, 'Methodological Considerations', critically examines the limitations the evidence available imposes on our understanding. 'Early Uses of Writing' addresses material and spatial aspects of inscriptions and their communicative functions over the textual ones. The third section, 'Material Features', deals with clay, wooden and papyrus manuscripts and demonstrates the importance of an integrated approach. The contributions to 'Co presence of Written Artefacts' take into account that written artefacts come in clusters. The final section, 'Cultural Encounters', presents studies on the interactions between social strata and ethnic groups, challenging previous ideas. The volume contributes to the comparative study of written artefacts in ancient history, stimulating cross-disciplinary and cultural research.

The second section Games reflects the authors conviction that games have a contribution to make in the mathematics classroom particularly in the areas of basic skills practice applications and logic and strategy development. The majority of activities are appropriate for the primary and elementary levels although many include variations suitable for higher grade levels.
