Violent geologic events have ravaged the Earth since time began spanning the vast eons of our planet's existence. These seismic phenomena have scored their marks in rock strata and been reflected in fossil records for future humanity to excavate and ponder. For most of the preceeding 78 000 years Homo sapiens simply observed natural climate upheaval. One hundred years ago however industrialization stunningly changed the rules so that now most climate change is driven by us. *Fire Storm and Flood* is an unflinching photographic record of the epic effects of a violent climate from the earliest extinction events to the present in which we witness climate chaos forced by unnatural global warming. It uses often emotional and moving imagery to drive home the enormity of climatic events offering a sweeping acknowledgment of our crowded planet's heartbreaking vulnerability and show stopping beauty. *The Garden*, 1896
