**Providence and the Invention of American History** Sarah Koenig,2021-06-29 How providential history the conviction that God is an active agent in human history has shaped the American historical imagination In 1847 Protestant missionary Marcus Whitman was killed after a disastrous eleven year effort to evangelize the indigenous peoples of the Pacific Northwest By 1897 Whitman was a national hero celebrated in textbooks monuments and historical scholarship as the Savior of Oregon But his fame was based on a tall tale one that was about to be exposed Sarah Koenig traces the rise and fall of Protestant missionary Marcus Whitman's legend revealing two patterns in the development of American history On the one hand is providential history marked by the conviction that God is an active agent in human history and that historical work can reveal patterns of divine will On the other hand is objective history which arose from the efforts of Catholics and other racial and religious outsiders to resist providentialists pejorative descriptions of non Protestants and nonwhites Koenig examines how these competing visions continue to shape understandings of the American past and the nature of historical truth

**By More Than Providence** Michael J. Green,2017-03-21 Soon after the American Revolution certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there Over the coming generations the United States continued to ask how best to expand trade with the region and whether to partner with China at the center of the continent or Japan looking

toward the Pacific Where should the United States draw its defensive line and how should it export democratic principles In a history that spans the eighteenth century to the present Michael J Green follows the development of U S strategic thinking toward East Asia identifying recurring themes in American statecraft that reflect the nation s political philosophy and material realities Drawing on archives interviews and his own experience in the Pentagon and White House Green finds one overarching concern driving U S policy toward East Asia a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade values and forward defense By More Than Providence works through these problems from the perspective of history s major strategists and statesmen from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America s stakes in the region especially when compared with those of Europe and the Middle East     **American Denominational History** Keith Harper,2008-09-24 This book brings the rigor of scholarly assessment of the current literature to various important topics and groups in American religious history The contributors carefully examine the fruitful historiographic questions that are posed by the positions and experiences of the various groups American Denominational History points the way for the next decade of scholarly effort
