The Making Of An Ex Astronaut:

The Making of an Ex-astronaut Brian O'Leary, 1970 *Inventing the American Astronaut* Matthew H. Hersch, 2012-10-08
Who were the men who led America's first expeditions into space? Soldiers, Daredevils. The public sometimes imagined them that way: heroic military men and hot shot pilots without the capacity for doubt, fear or worry. However, early astronauts were hard working and determined professionals, organization men who were calm, calculating and highly attuned to the politics and celebrity of the Space Race. Many would have been at home in corporate America and until the first rockets carried humans into space, some seemed to be headed there. Instead, they strapped themselves to missiles and blasted skyward, returning with a smile and an inspiring word for the press. From the early days of Project Mercury to the last moon landing, this lively history demystifies the American astronaut while revealing the warring personalities, raw ambition and complex motives of the men who were the public face of the space program. *Bulletin of the Atomic Scientists*, 1971-03. The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world.

The Classic Jewish Philosophers Eliezer Schweid, 2007-10-01. This book provides a standard reference of the major medieval Jewish philosophers as well as an eminently readable narrative of the course of medieval Jewish philosophical thought presented as a response to the spiritual intellectual challenges facing Judaism in that period. The accounts of Saadia Bahya Halevi Maimonides and Crescas are among the fullest available in English. Other thinkers discussed in depth include Israeli Ibn Gabirol, Gersonides and Albo. The work also includes capsule summaries of Bar Hiyya, Falaquera, Albalag, Duran, Abravanel and others. All of the summaries place the philosophical thought of these important thinkers in the context of the historical challenges and religious concerns of their age. *Routledge Handbook of Space Policy* Thomas Hoerber, Mariel Borowitz, Antonella Forganni, Bruno Reynaud de Sousa, 2024-12-30. This volume offers a comprehensive overview of the field of space policy. Space is a technology-driven domain and policy development has accelerated in recent years at a time when the space economy has begun to show remarkable potential. Thus, this handbook gathers experts from different fields with the aim of 1) offering an overview of the state of play regarding space policy issues and 2) expanding knowledge about possible future developments. Given the cross-disciplinary nature of the subject and its vast scope, the authors' contributions are grouped within different thematic sections as follows: Theoretical structures for an understanding of space policies; The history of space; Society, justice and the human impact; Governance of space; Popularisation of space; New frontiers in space and expansion into the unknown; World space policies by geographic areas. The introduction and the conclusion chapters provide a coherent connection between the contributions, with each section presenting transversal themes such as power dynamics and rules, commercialisation, sustainability, militarisation, applications and domestic use, and justice. This volume will be of much interest to students of space policy and power, security studies and international relations. **Studies in the**
