Huerta, 2003 In a widely researched and deeply considered book Huerta argues that Vermeer s use of the camera obscura and other instrumental adjuncts parallels van Leeuwenhoek s pursuit of the optical way and embodies a profound philosophical connection between these investigators Analyzing Vermeer s work Huerta shows that the artist s choices were the result of his personal response to contemporary scientific discoveries and the work of men such as van Leeuwenhoek Christiaan Huygens and Galileo Galilei Furthermore Huerta compares Vermeer s program of informed observation to the methods used by van Leeuwenhoek and other scientists to accumulate and analyze instrument mediated knowledge This approach enabled Vermeer to confront the same issues as natural philosophers regarding the interpretation of unfamiliar images presented by instrumental systems
