Hutchinson, 2001 **War Under Waves** Fred Warshofsky, 2019-12-06 War Under the Waves first published in 1962 is a non technical overview of the history of the military submarine Beginning with the Turtle of the American Revolutionary War the Hunley of the Civil War and continuing on to famous World War One and Two submarines such as the USS Growler and USS Harder War Under the Waves provides a look at look at the crews and their submarines as they engaged the enemy and helped make the submarine one of the most important tools of naval warfare *The War Beneath the Sea* Willy Charles Brou, 1958 **Combat Beneath the Sea** Willy Charles Brou, 1957 **The Great War** Herbert Wrigley Wilson, Sir John

Alexander Hammerton, 1914 **Chambers's Journal**, 1915 *War Beneath the Sea* Peter Padfield, 2013-06-07 This is the first book to cover all submarine and anti submarine operations of the major powers U S British German Japanese and Italian in the Second World War The canvas is broad and deep from the strategic perspective at the top to the cramped and claustrophobic life of the crews in their submersible steel tubes from the feats of ace commanders to the terrifying experiences of men under attack in this most pitiless form of warfare Peter Padfield describes the technical and tactical

measures by which the Western Allies countered Admiral Karl Donitz's U boat pack attacks in the all important North Atlantic battle the fanatical zeal with which even after defeat Donitz continued sacrificing his young crews in outmoded boats dubbed by one veteran iron coffins while in the Pacific the superiority of American fleet submarines and radar allowed the U S to isolate Japan from her overseas sources of supply Padfield argues that if this strategic potential had been realised earlier it could have saved thousands of lives in the bloody Pacific island campaigns and even rendered the use of atomic bombs unnecessary Peter Padfield is the best British naval historian of his generation His book will now become the standard work on the subject John Keegan *The Daily Telegraph* This looks set to become the definitive work on submarine warfare in the Second World War Paul Hoxton *Military Illustrated* By far the best and most complete critical history of the submarine operations of all the combatants in the Second World War at the same time providing vivid narrative accounts of particular actions Alan Cameron Lloyd's List Peter Padfield has written a superb history of a complex and controversial subject It is a valuable addition to our body of history of World War II and I recommend it highly Vice Admiral James F Calvert USN Rtd U S N I Proceedings This monument to the submarine arms of the major belligerents tells the story of their triumphs and tragedies and comes from one of our ablest naval historians Graham Rhys Jones R U S I Journal the book is very well written and enjoyable to read The facts and statistics are mixed with well penned character studies and fast moving descriptive narrative in a way that confirms the author's stature as a leading military historian The Naval Review a near flawless work of history that can be recommended both as a serious study and a compelling read The Officer Magazine Probably one of the most valuable books ever written on submarine operations and countermeasures for World War II history in the Bravo category Canadian Military History Book Review Supplement Padfield keeps an unwavering balance between providing the depth of history and maintaining an exciting narrative The Times *The Outlook* ,1907 *Chambers's Journal of Popular Literature, Science and Arts* ,1915 *Tracing the Undersea Dragon* Amit Ray,2021-08-05 This book is a comprehensive study of the development of China's nuclear powered ballistic missile submarines SSBNs It offers insights into the secretive world of nuclear submarines and ballistic missiles of the Chinese PLA Navy and studies how these are likely to grow in the next two decades The volume examines the technological origins of the design and development of Chinese nuclear submarines ballistic missiles and their naval construction capabilities It provides an analysis of the underlying Chinese nuclear doctrine China's maritime geographical constraints for submarine operations and the credibility of its sea based deterrence It draws upon strategy nuclear policy technology geography and operational considerations to holistically predict the likely SSBN force levels of the PLA Navy for various scenarios The book also assesses the spectrum of threats likely from the undersea domain for India and other nations in the Indo Pacific region A key text on an obscure but vital facet of Chinese defence studies this book will be useful for scholars and researchers of strategic affairs international relations and disarmament studies peace and conflict studies geopolitics foreign policy Indo Pacific studies and diplomacy **Submarine**
