Nightmare Joseph Stefano,2022-06-08 A science fiction teleplay featured on The Outer Limits written by Joseph Stefano

Nightmare Doug Murray,1986 Describes the plots themes and production crew of the science fiction television show

The Outer Limits Profiles the show s producer Tony Stefano *The Outer Limits* Joanne Morreale,2022-04-05 Provides a history and criticism of an important disrupting force in early science fiction television programming In this TV Milestone author Joanne Morreale highlights the differences of The Outer Limits ABC 1963 65 from typical programs on the air in the 1960s Morreale argues that the show provides insight into changes in the television industry as writers turned to genre fiction in this case a hybrid of science fiction and horror to provide veiled social commentary The show illustrates the tension between networks who wanted mainstream entertainment and the independent writer producers Leslie Stevens and Joseph Stefano who wanted to use the medium to challenge viewers In five chapters The Outer Limitsmakes a case for the show s deployment of gothic melodrama and science fiction tropes unique televisual characteristics and creative adaptation of many cultural sources to interrogate the relationship between humans and technology in a way that continues to influence contemporary debate in such shows as Star Trek The X Files and Black Mirror Underlying the arguments is the eerie notion of The Outer Limitsas a disruptive force on television at the time purposely making audiences uncomfortable For example in its iconic opening credit sequence a disembodied Control Voice claims to be taking over the television as images mimic signal interference Other themes convey Cold War paranoia ambivalence about the Kennedy era New Frontier and anxiety about the burgeoning military industrial governmental complex The book points out that The Outer Limits presaged what came to be known as quality television While most episodes followed the lowbrow tradition of televised science fiction by adapting previously published stories and films the series elevated the genre by rearticulating it through themes and images drawn from myth literature and the art film The Outer Limits is lucid yet accessible well researched and argued with enlightening discussions of specific episodes even as it gives attention to broader television history and theory It will be of special interest to scholars and students of television and media studies as well as fans of science fiction **Bowker's Complete Video**

Directory, 1999 ,1999 *1999: A Space Odyssey* John K Balor,2018-08-03 Part of the premise of the online discussion transcribed in this book is how Gerry Anderson s television series Space 1999 can be understood in relation to Stanley Kubrick s 2001 A Space Odyssey by looking at both narratives through the perspective of systems theory As a result of doing so an engaged debate concerned with the political and philosophical subtext of both stories developed This book gives a full account of the debate with summaries of ideas and insights The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com **The Spacesuit Film** Gary Westfahl,2014-01-10 Filmmakers employ various images to suggest the strangeness of outer space but protective spacesuits most powerfully communicate its dangers and the frailty of humans beyond the cradle of Earth Many

films set in space however forgo spacesuits altogether reluctant to hide famous faces behind bulky helmets and ill fitting jumpsuits This critical history comprehensively examines science fiction films that portray space travel realistically and sometimes not quite so by having characters wear spacesuits Beginning A with the pioneering Himmelskibet 1918 and Woman on the Moon 1929 it discusses B other classics in this tradition including Destination Moon 1950 Riders to the Stars 1954 and 2001 A Space Odyssey 1968 C films that gesture toward realism but betray that goal with melodramatic villains low comedy or improbable monsters D the distinctive spacesuit films of Western Europe Russia and Japan and E America s spectacular real life spacesuit film the televised Apollo 11 moon landing 1969 Fantastic Worlds Howard
