Life and Labour of the People in London Charles Booth,1892 **The Row House in Washington, DC** Alison K. Hoagland,2023-05-10 With The Row House in Washington DC the architectural historian and preservationist Alison Hoagland turns the lucid prose style and keen analytical skill that characterize all her scholarship to the subject of the Washington row house Row houses have long been an important component of the housing stock of many major American cities predominantly sheltering the middle classes comprising clerks tradespeople and artisans In Washington with its plethora of government workers they are the dominant typology of the historical city Hoagland identifies six principal row house types two room L shaped three room English basement quadrant and kitchen forward and documents their wide ranging impact as sources of income and statements of attainment as well as domiciles for nuclear families or boarders homeowners or renters long tenancy or short stays Through restrictive covenants on some house sales they also illustrate the pervasive racism that has haunted the city This topical study demonstrates at once the distinctive character of the Washington row house and the many similarities it shares with row houses in other mid Atlantic cities In a broader sense it also shows how urban dwellers responded to a challenging concatenation of spatial regulatory financial and demographic limitations providing a historical model for new innovative designs Publication of this volume was assisted by a grant from Furthermore a program of the J M Kaplan Fund **Investigation of the Program of the National Capital Housing Authority** United States.
