## **The Parasites:**

The Importation Into the United States of the Parasites of the Gipsy Moth and the Brown-tail Moth Leland Ossian Howard, William Fuller Fiske, 1911    Checklist of the Parasites of Fishes of the Philippines James Richard Arthur, Susan Lumanlan-Mayo, Food and Agriculture Organization of the United Nations, 1997-01-01 This checklist summarizes information on the parasites of Philippine fishes contained in the world literature dating from the earliest known record de Blainville 1822 to the end of 1996. Information is presented in the form of parasite host and host parasite lists. Included are 201 named species of parasites distributed among the higher taxa as follows: Apicomplexa 1, Ciliophora 16, Mastigophora 2, Microspora 1, Myxozoa 9, Trematoda 90, Monogenea 22, Cestoda 6, Nematoda 20, Acanthocephala 5, Mollusca 1, Branchiura 2, Copepoda 21, and Isopoda 5. Also included are many records of parasites not identified to species level. Parasites have been reported from 172 of the more than 2030 species of marine and freshwater fish occurring in Philippine waters and from another 17 species of freshwater aquarium fish examined in the Philippines but not found in natural waters. The Parasite Host List is organized on a taxonomic basis and provides information for each parasite species on the environment, fresh water, brackish water, marine, the location site of infection in or on its host, the species of host, s, infected, the known geographic distribution by island in the Philippines and the published sources for each host and locality record. The Host Parasite List is organized according to the taxonomy of the hosts and includes for each host the English language and local, typically Tagalog, common names, environment, fresh water, brackish water, marine status in the Philippines, native or exotic, and information on the known Philippine distribution of the parasites. Both lists are accompanied by remarks and footnotes as warranted, giving specific information on points of systematics, nomenclature, possible misidentifications, introductions, pathogenicity, etc. Citations are included for all references and a supplementary list of references contains other literature on Philippine fish parasites. Parasite and host indices are included. The following new taxonomic combinations are made: *Prosorhynchoides philippinorum* Velasquez 1959 n. comb. for *Bucephaloides philippinorum* Velasquez 1959, *Prosorhynchoides sibi* Yamaguti 1940 n. comb. for *Bucephaloides sibi* Yamaguti 1940, *Genolinea awa* Yamaguti 1965 n. comb. for *Pseudobunocotyla awa* Yamaguti 1965, and *Procamallanus Spirocammallanus philippensis* Velasquez 1980 n. comb. for *Spirocammallanus philippensis* Velasquez 1980.    **Checklist of the Parasites of Fishes of Latvia** Muza Kirjušina, K?rlis Vismanis, Food and Agriculture Organization of the United Nations, 2007-01-01 This checklist summarizes information on the parasites of Latvia fishes contained in the world literature dating to the end of 2005. Information is presented in the form of parasite host and host parasite lists and includes 305 named species of parasites. Also included are many records of parasites not identified to species level. The Parasite Host List is organized on a taxonomic basis and provides information for each parasite species on the environment, freshwater, brackish, marine, the location site of infection in or on its host, s, the species of host, s, infected, the known geographic distribution by major waterbody in Latvia and the published sources for each host and locality record. The

common freshwater fish species particularly those having economic importance such as the cyprinids percids esocids and salmonids have been particularly well studied providing a good general picture of their parasite faunas and data having value for use in faunistic analyses This checklist is part of FAO's continuing effort to address the need of information on the occurrence of diseases and pathogens of aquatic animals Three previous checklists have summarized the parasites of fish of the Philippines Bangladesh and Viet Nam     *The Parasites of the Sugarcane Borer in Argentina and Peru, and Their Introduction Into the United States* A.
