# PREVENT STROKE BEFORE IT STRIKES

Stroke prevention follows a similar principle of controlling risk factors.

Up to 80% of strokes can be prevented through healthy lifestyle changes and working with healthcare practitioners to help manage your risks.

#### MOVE MORE

Do at least 2½ hours of moderate to strenuous exercise each week.

#### EAT A HEALTHY DIET

Stay away from trans and saturated fats, reduce salt intake, and avoid processed foods.

#### DRINK MODERATELY

Drink in moderation to prevent risk factors caused by alcohol that can lead to stroke.

#### QUIT SMOKING

For every five cigarettes a person smokes each day, the risk of having a stroke goes up by 12%. Quit now.

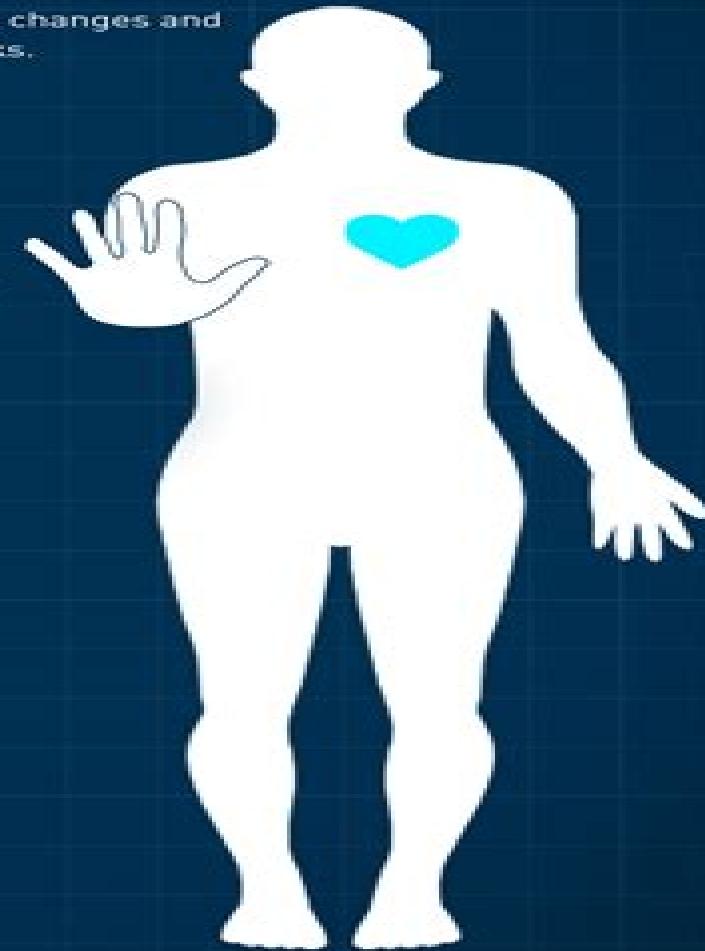

#### MANAGE OTHER CONDITIONS

Manage heart conditions that can increase your chances of getting a stroke.

#### CONTROL HIGH BLOOD PRESSURE

Hypertension is a major risk factor for stroke. Up to 40% of all strokes can be prevented with good blood pressure control.

**BLOOD PRESSURE FLUCTUATES  
THROUGHOUT THE DAY.**

To keep it in check, monitor it regularly at home.

**Handbook of Stroke Prevention in Clinical Practice** Karen L. Furie, Peter J. Kelly, 2004-04-28 Despite major advances in the understanding of stroke mechanisms that have occurred over the past quarter century stroke continues to rank among the leading causes of death and disability worldwide Although currently it may be difficult to believe early doubts were expressed as to whether interventions in risk factors for either coronary disease or stroke would actually lead to a reduction in the incidence of these disorders However large clinical trials in hypertension carotid disease atrial fibrillation and antithrombotic and antiplatelet therapies have effectively demonstrated the efficacy of these targeted interventions in reducing stroke incidence More recently after earlier uncertainty regarding the role of elevated lipids as a risk factor for stroke clinical trials of the statins have also demonstrated a significant reduction in the incidence of ischemic stroke However as emphasized in **Handbook of Stroke Prevention in Clinical Practice** despite these gains and the initial decline in stroke incidence that did occur in the 1960s and 1970s the incidence of stroke disappointingly has failed to show a further significant decline since that time The editors of **Handbook of Stroke Prevention in Clinical Practice** raise the very important question of whether recognized strategies for stroke prevention have been widely or effectively implemented They correctly emphasize the critical importance of identifying the mechanism of stroke in each patient so as to properly direct prevention and treatment As Dr **What You Should Know about Stroke and Stroke Prevention** Arthur Ancowitz, 1979
