## **Ecological Tax Reform A Policy Proposal For Sustainable Development:**

**Ecological Tax Reform** Ernst Von Weizsacker, Jochen Jesinghaus, 1992-07-01 Carbon taxes energy taxes and related measures are gaining increasing popularity around the world as governments activists and international bodies seek an effective way of integrating economic and environmental policies Ecological Tax Reform offers a timely exploration of this key component of the global fight against climate change Providing a useful overview of the arguments for and against environmental taxation the book s central proposition is that such taxes can play an instrumental role in promoting environmentally friendly industry as well as raising valuable funds for economic development and state efforts to combat global warming The authors go on to argue that such taxes could be usefully applied to such diverse economic areas as fossil fuel consumption nuclear energy water raw materials and waste Concise and accessible to undergraduates as well as the general reader Ecological Tax Reform represents the perfect introduction for those seeking to understand the role which taxation can play in achieving a more sustainable society **Economic and Political Weekly** ,1993 **Bridging Divides**

**- Transformation in Eastern Europe** Friedemann Müller, 1998 **Sourcebook on Sustainable Development** International Institute for Sustainable Development, 1992 This directory brings together important material from a wide variety of relevant sources beginning with a listing and description of about 70 of the principal international organizations active in the field of sustainable development It covers general publications and guidebooks economy and ecology social and community issues and solutions environment and natural resources investment for sustainable development and regional and country reports Information is also given on audio visual productions and resources computer networks and conferencing systems and online databases A glossary is included The appendices provide detail on computer technology and practices

**Trade, Sustainable Development and the Environment** Maria Isolda P. Guevara, Centre for Trade Policy and Law, 1995 To facilitate reference entries in this bibliography are classified under the following major topics issues and perspectives related to trade sustainable development and the environment trade environment and international organisations such as the International Monetary Fund World Bank United Nations and multinational corporations environmental agreements laws policies regulations and instruments the environment and trading arrangements such as the General Agreement on Tariffs and Trade the environment and key sectors with a focus on agriculture forestry and energy and theoretical analytical and methodological issues concerning environment and development In each classification entries are arranged alphabetically by author Some entries are repeated in different categories if they are pertinent to more than one category **Sustainable Developmental Strategy** Surya Pal Shukla, Nandeshwar Sharma, 1996 Papers presented at a seminar on sustainable agriculture chiefly with reference to India and partly to Arunachal Pradesh *International Journal of Sustainable Development* ,2001 **The Transition to Sustainability** Timothy O'Riordan, Heather Voisey, 1998 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company *Nature and Resources* ,1992

**Widener Law Review**, 2003      Ecological Integrity David Pimentel, Laura Westra, Reed F. Noss, 2000-11 Global Integrity Project has brought together leading scientists and thinkers from around the world to examine the combined problems of threatened and unequal human well being degradation of the ecosphere and unsustainable economies Based on the proposition that healthy functioning ecosystems are a necessary prerequisite for both economic security and social justice the project is built around the concept of ecological integrity and its practical implications for policy and management Ecological Integrity presents a synthesis and findings of the project Contributors including Robert Goodland James Karr Orie Loucks Jack Manno William Rees Mark Sagoff Robert Ulanowicz Philippe Crabbe Laura Westra David Pimentel Reed Noss and others examine the key elements of ecological integrity and consider what happens when integrity is lost or compromised The book examines historical and philosophical foundations of the concept of ecological integrity explores how integrity can be measured examines the relationships among ecological integrity human health and food production looks at economic and ethical issues that need to be considered in protecting ecological integrity offers concrete recommendations for reversing ecological degradation while promoting social and economic justice and welfare Contributors argue that there is an urgent need for rapid and fundamental change in the ecologically destructive patterns of collective human behavior if society is to survive and thrive in coming decades Ecological Integrity is a groundbreaking book that integrates environmental science economics law and ethics in problem analysis synthesis and solution and is a vital contribution for anyone concerned with interactions between human and planetary health      Economic Instruments for Environmental Management in Developing Countries Organisation for Economic Co-operation and Development, 1993 Includes 7 papers from a workshop held 8-10-92 in Paris      *Bibliographie Mensuelle. Partie I, Livres, Documents Officiels, Publications en Série* United Nations Library (Geneva, Switzerland), 1995      *Sustainable Urban Development* Stephen M. Wheeler, 1996

**Steering Business Toward Sustainability** Fritjof Capra, 1995 Sustainability in its ecological and social components poses businesses an inescapable challenge without sustainability there will be an end to profits Hence business people have a strong self interest in minimizing the ecological damage of their operations In this book business executives economists ecologists and other thinkers outline new practical approaches that businesses and society must take to meet this challenge

Environmental Taxes Kalle Määtä, 2006 Environmental taxes differ from each other according to the functions they serve and the manner in which they are implemented This study highlights the appropriateness of different kinds of environmental taxes against a rigorous framework of theory and case study evidence The purpose of this book is to analyse the way in which environmental taxes are categorized and which factors affect the effectiveness and efficiency of the different kinds of environmental taxes in practice This pragmatic approach is emphasized along with the multiplicity of regulatory problems such as At what level should the environmental tax rate be set What is the proper time schedule for introducing an environmental tax What are the most appropriate taxable characteristics and how should they be determined What activities

should be exempt from environmental taxation How can tax relief be implemented These are only some of the regulatory problems explored in this study which also encompasses an examination of the theory of regulation The author argues that economists have often paid too little attention to the administrative and legal issues concerning the implementation of legislation such as environmental tax laws which are of course vital to the success of any potential policy Lawyers too have in turn neglected the theory of regulation which would assist in analysing problems in a future oriented way Environmental Taxes will therefore be of great interest to a wide audience of environmental economists law and economics scholars as well as policymakers

**Sustainability and the Social Sciences** Egon Becker, Thomas Jahn, 1999-10 Exploring how the concept of sustainability might be applied in each of the social sciences this book argues that environmental questions will increasingly dominate humanity in the course of the 21st century This holds out the opportunity and practical necessity to stimulate new lines of theoretical development within the social sciences and new forms of intellectual cooperation across them

*Macro-environmental Policy* G. Huppes, 1993 The central theme of this book is how macro environmental policy can be developed which does not prescribe or suggest specific technologies and products but realises the environmental quality desired by changing the general context and the normative principles for policy design and evaluation the first two parts form the analytic core The framework for analysis gives a classification of instruments in terms of permutations of a limited number of defining elements The normative principles guide choices in instrument design and as the flexible response strategy guide their application in specific policies Detailing two main new instruments the standard method for LCA and the substance deposit and applying the instrument strategy as developed to the cases make up the next two parts Social scientists and policy scientists might concentrate on the framework while those engaged in the theory of policy development and policy analysis including strategic analysis might find items of prime interest in the part on principles Those interested in specific environmental problems may find particular value in the extensive case studies
