

# HOW TO READ A SAFETY DATA SHEET

## OSHA Brief

The Hazard Communication Standard (HCS) (29 CFR 1910.1201), revised in 2012, requires that the chemical manufacturer, distributor, or importer provide Safety Data Sheets (SDSs) (formerly MSDSs or Material Safety Data Sheets) for each hazardous chemical to downstream users to communicate information on these hazards. This brief provides guidance to help workers understand a standard chemical to become familiar with that label and understand the contents of the SDSs.

The SDS includes information such as the properties of each chemical, its physical, health, and environmental health hazards, protective measures, and safety precautions for handling, storage, and transport of the chemical. This information contained in the SDS must be in English (although it may be in other languages as well). In addition, OSHA requires that SDSs prominently provide specific information as detailed in Appendix D of 29 CFR 1910.1201. The SDS program may also include information in other languages.

Hazard Communication Standard Safety Data Sheet Sections 1 through 8 contain general information about the chemical, identification, hazards, classification, safe handling practices, and emergency-control measures. This information should be helpful to those that need to get the information quickly. Sections 9 through 12 are to contain either technical and scientific information and chemical properties, toxicology and reactivity information, toxicological information, exposure control information, and other information including the state of preparation or test results. The SDS must also state that the applicable information used when the product does not meet relevant information for any required element.

The SDS must also contain Sections 13 through 15, to be consistent with the 15th Globally Harmonized System of Classification and Labeling of Chemicals (GHS), but OSHA will not enforce the content of these sections because they contain matters handled by other agencies.

## Section 1: Identification
