The Constitution of Phenomenal Consciousness Steven M. Miller, 2015-06-15 Philosophers of mind have been arguing for decades about the nature of phenomenal consciousness and the relation between brain and mind. More recently, neuroscientists and philosophers of science have entered the discussion. Which neural activities in the brain constitute phenomenal consciousness and how could science distinguish the neural correlates of consciousness from its neural constitution? At what level of neural activity is consciousness constituted in the brain and what might be learned from well-studied phenomena like binocular rivalry, attention, memory, affect, pain, dreams, and coma? What should the science of consciousness want to know and what should explanation look like in this field? How should the constitution relation be applied to brain and mind and are other relations like identity, supervenience, realization, emergence, and causation preferable? Building on a companion volume on the constitution of visual consciousness, *AiCR 90* this volume addresses these questions and related empirical and conceptual territory. It brings together for the first time scientists and philosophers to discuss this engaging interdisciplinary topic.

Open IT-Based Innovation: Moving Towards Cooperative IT Transfer and Knowledge Diffusion Gonzalo León, Ana M. Bernardos, José R. Casar, Karlheinz Kautz, Janice I. DeGross, 2008-09-25 The 11 Working Conference of IFIP WG 8.6 Open IT Based Innovation Moving Towards Cooperative IT Transfer and Knowledge Diffusion organized in Madrid in October 22-24 2008 follows the series started in Oslo in 1995 and continues in the footsteps of the past year's conference in Manchester. This year, although the Madrid Conference addresses the usual topics covered in previous WG8.6 conferences, the emphasis is on the issue of open innovation and its relationships with technology transfer and diffusion in the field of information technology. This issue is deeply modifying the

way that knowledge is generated shared transferred diffused and used across the world as a side effect of globalization It affects the organizational structure partnerships roles assumed by stakeholders and technology transfer and diffusion models and instruments Industry academia and governments are simultaneously concerned Although the concept applies to all industrial sectors IT companies were early innovators The analysis of the contents of this book allows the identification of some trends in technology transfer and diffusion issues as a part of the innovation process The same problem is addressed in very different ways and extrapolation is not straightforward Even innovation terminology is not clearly shared by different subcultures in the field
