Enchanted Maidens James M. Taggart, 1990-02-04

Spanish villagers tell many folktales that describe in metaphorical language the struggles of young men and women as they emerge from their parental families and join in love. In this book James Taggart presents dozens of orally transmitted tales including Snow White, Cinderella, Beauty and the Beast, Blancaflor, and dragonslayer stories collected from seven villages in the region of CNBceres and analyzes the differences in male and female approaches to telling them. His study shows how men and women use the tales to grapple with some of the contradictions found in gender relations in their culture which conditions men to be sexually assertive and to marry virgins and which teaches women to fear the men who court them. Taggart interprets the male-female dialogue voiced through storytelling by linking the content of specific tales to the life experiences and gender of the storyteller. Men and women he finds carry out an exchange of ideas by retelling the same stories and altering the plots and characters to express their respective views of courtship. This indirect narrative dialogue conveys an understanding of the opposite sex and establishes a common model of marriage that permits men and women to overcome their fear of each other and bond in heterosexual love.

Pediatric Psycho-oncology Shulamith Kreitler, Myriam

Weyl, Ben-Arush, Andrés Martín, 2012-08-13 Like the ground-breaking first edition, *Pediatric Psycho-oncology* Second edition puts the child at the centre of medical and psychological care. It broadens the focus beyond treatment and cure to consider the quality of life of the child and their family. Written by an international group of pediatric oncologists and psychologists, psycho-oncologists brought together by an expert editorial team, it focuses on the real-life practical aspects of children undergoing treatment for cancer. This edition has been restructured and opens with a major section on Active treatment which includes chapters addressing quality of life, pain, psychosocial aspects of treatment and interventions, art therapy and different fantasy-based techniques, palliative care, communication and education, as well as a new chapter on psychopharmacology. Shorter sections then discuss survivorship and care of the dying child, including a new chapter on bereavement. The final section comprises new chapters on ethical considerations and on addressing the emotional needs of children whose parents have cancer, as well as a case study on international collaboration. An appendix provides a comprehensive overview of tools for evaluation and assessment in pediatric psycho-oncology. This book is a highly practical resource that will be invaluable for all health care professionals looking after children and adolescents with cancer. Praise for the first edition: a welcome addition to the field. I highly recommend it to all health care professionals involved in the treatment of childhood cancer patients. *Journal of the American Medical Association* November 2004
