Land Use Planning

Prof Dr Barrie Needham

Land Use Planning:

Dutch Land-use Planning Prof Dr Barrie Needham, 2014-03-28 Dutch planning is widely known and admired for its ambitions and its achievements. This book provides for the first time a comprehensive description and analysis in English of its full range of policies and practices. It gives an up to date account of the principles written and unwritten behind the planning and in addition shows how the practice sometimes ignores those principles in order to achieve better results. It describes the content of the policies, the measures taken to realise them and the successes and failures. The book is not uncritical of Dutch land use planning but the author values its strengths and believes that planning in other countries could learn from them. These strengths arise in the continuing tension between the high ambitions of the Dutch planning and the ingenuity and pragmatism exercised in order to realise those ambitions.

Strategic Environmental Assessment in

Transport and Land Use Planning Thomas B. Fischer, 2023-04-28 Assessing the full scale of environmental impacts is essential for effective planning of transport and land use. This is an analysis of transport and land use planning using strategic environmental assessment (SEA). It establishes the effectiveness of SEA through comparative studies of practice in three countries: Britain, the Netherlands and Germany. The author shows that use of SEA is widespread but far from systematic. He demonstrates the advantages of adopting a systematic application of a comprehensive form of SEA derived from all the major current approaches. Only once this approach is fully understood and systematically applied will all the full benefits be achieved and environmental impacts be minimized.

Mapping and Forecasting Land Use

Paulo Pereira, Eduardo Gomes, Jorge Rocha, 2022-08-18 Mapping and Forecasting Land Use: The Present and Future of Planning is a comprehensive reference on the use of technologies to map land use, focusing on GIS and remote sensing applications and methodologies for land use monitoring. This book addresses transversal topics such as urbanisation, biodiversity loss, climate change, ecosystem services and participatory planning, with the pros and cons of various aerial technologies in mapping and land use. It follows a multidisciplinary approach and provides opinions and evidence from leading researchers working in academic institutions across the globe. The book's second half moves from theory and research advancement into case studies, compiling global examples to provide real world context and evidence of the techniques and applications. Mapping and Forecasting Land Use is a valuable guide for graduates, academics and researchers in the fields of geography, geographic information science and land use science who want to effectively apply GIS and remote sensing capabilities to mapping or wider land studies. Researchers in geosciences, environmental science and agriculture will also find this of value in utilising 21st century technologies in their field. Provides a guide to land use mapping technologies including GIS and remote sensing. Covers a wide field of interdisciplinary subjects related to GIS applications in land use. Features global case studies alongside exploring theory and current research in the field.

J. T. Corkindale, 2004-02-20 The system of land use planning in the UK dates back to the 1947 Town and Country Planning Act. This title examines government's

based or environmental land use planning as tools that strengthen land governance. Further it demonstrates how to use these types of land use planning to improve economic opportunities based on sustainable management of land resources and to develop land use options that strike a balance between conservation and development objectives. Competition for land is increasing as demand for multiple land uses and ecosystem services rises. Food security issues, renewable energy and emerging carbon markets are creating pressures for the conversion of agricultural land to other uses such as reforestation and biofuels. At the same time there is a growing demand for land in connection with urbanization and recreation, mining, food production and biodiversity conservation. Managing the increasing competition between these services and balancing different stakeholders' interests requires efficient allocation of land resources.

Environmental Analysis William M.

Marsh, 1978 **Land Ownership and Land Use Development** Erwin Hepperle, Robert Dixon-Gough, Reinfried

Mansberger, Jenny Paulsson, Józef Hernik, Thomas Kalbro, 2017-01-10. Across Europe land is constantly the subject of enormous and widely varied pressures. The land we have is shrinking in area due to numerous reasons including those that are directly related to climate change and migration. In fact all disciplines that have responsibilities for the husbandry, use, management and administration of the land are forced to address the problems of how to plan and how to utilise this increasingly valuable resource. The papers contained within this book emerge from two symposia held in 2014 and 2015 which now have been arranged along four general themes reflecting the multi disciplinary nature of the disciplines concerned with land. The first part is dedicated to the interpretation of key terms in their context and the dissimilar conceptual approaches in the governance of different states. It is followed by papers that identify the process of decision taking, how to organize and co-operate. One large section addresses the identification of land pattern changes and the reason for it. The papers in the final cluster deal with the general theme of strategies and measures used to steer future evolution in land policies. The publication addresses various needs that have to be balanced: the tasks of living space in the face of societal and demographic changes, infrastructure supply, challenges of an increasingly urbanised region, food production, green energy, natural hazards, habitats and cultural landscapes protection.
