United Kingdom **Quantitative Risk Assessment in Regulation** Lester B. Lave, 1982 Exemplary stories of innovation from around the world In an age of rising inequality getting a good education increasingly separates the haves from the have nots In countries like the United States getting a good education is one of the most promising routes to upper middle class status even more so than family wealth Experts predict that by 2030 825 million children will reach adulthood without basic secondary level skills and it will take a century for the most marginalized youth to achieve the educational levels that the wealthiest enjoy today But these figures do not even account for the range of skills and competencies needed to thrive today in work citizenship and life In a world where the ability to manipulate knowledge and information think critically and collaboratively solve problems are essential to thrive access to a quality education is crucial for all young people In Leapfrogging Inequality researchers chart a new path for global education by examining the possibility of leapfrogging harnessing innovation to rapidly accelerate educational progress to ensure that all young people develop the skills they need for a fast changing world Analyzing a catalog of nearly 3 000 global education innovations the largest such collection to date researchers explore the potential of current practices to enable such a leap As part of this analysis the book presents an evidence based framework for getting ahead in education which it grounds in the here and now by narrating exemplary stories of innovation from around the world Together these stories and resources will inspire educators investors leaders of nongovernmental organizations and policymakers alike to rally around a new vision of educational progress one that ensures we do not leave yet another generation of young people behind **Occupational Safety and Health Law** Victoria L.
