Sea Level Variability and Change Ivan D. Haigh, Marta Marcos, Sönke Dangendorf, Francisco Calafat, 2017-04-27 In June 2015 we held a workshop on the beautiful island of Mallorca Spain with a focus on sea level variability and change. Over 120 sea level experts from around the world attended this workshop from a range of different disciplines. The main aims of the workshop were to 1 Evaluate the current state of knowledge of sea level science 2 Identify gaps and unresolved questions in any aspect of sea level science and 3 Design future research to address these issue. All aspects of sea level changes were covered from global to regional observations and modelling processes driving mean sea level changes and extremes from the geological scale to the instrumental era and future projections and including impacts on the coastal zones. This E Book presents papers that came out of that workshop. Overall these papers illustrate the multi disciplinary nature of sea level research cross cutting many fields of research including oceanography, meteorology, geology, coastal morphodynamics, engineering and the social economic aspects. Collectively these articles represent an interesting range of perspectives and original studies that contribute to understanding the dynamic nature of sea level and its impacts across a wide range of time and space scales. Congressional-Executive Commission on China, 2014 **Contested Curriculum** Don Romesburg, 2025-04-15 Today many states have proposed so called Don t Say Gay bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom. But a few states like California have taken decisive steps in the other direction. They mandate inclusive education that treats LGBTQ history as essential to the curriculum. At once a history of an evolving movement and an activist handbook, Contested Curriculum navigates the rocky path to LGBTQ inclusive K 12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives. What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California s landmark FAIR Education Act in 2011 ensuring that LGBTQ history has a place in the K 12 classroom. Historian Don Romesburg the lead scholar who worked

with advocacy organizations to pass the act recounts the decades long struggle to integrate LGBTQ content into history education policy textbooks and classrooms Looking at California and states that followed its lead he assesses the challenges and opportunities presented by this new way of teaching history Romesburg s powerful case for LGBTQ inclusive education is all the more urgent in this era of anti gay book bans regressive legislation and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation
