Strategic Readiness Timothy Griffith, 2021 Today the American people are faced with more challenges than they have ever been faced with before Challenges that are so complex diverse intertwined and further complicated by factors such as globalization climate change authoritarianism and technology that it is becoming extremely difficult to predict what the future of national security will hold Simultaneously the difficulty in establishing and maintaining a consistently resourced and coordinated strategy is muddled by partisan politics annual budgets a 4 year Presidential election cycle and an unstable and unpredictable security environment It is crucial that the United States specifically the Department of Defense DoD develops a Strategic Readiness methodology by which its most important security strategies can be assessed periodically against the objectives that define them in a way that is credible to the whole of government Strategic readiness is the comprehensive assessment of not only operational readiness data but the holistic view of how the DoD is meeting the objectives of the National Defense Strategy Today the Defense Department focuses their readiness efforts on individual problem sets centered around U S strategic competitors These problem sets encompass primary and supporting operational plans that are not always resource and readiness informed Readiness efforts are also focused on establishing readiness goals based on supply versus demand from the Combatant Commanders It is evidently clear after reviewing the current policies and procedures in place that the DoD lacks a Strategic Readiness methodology The current readiness system is myopic and puts too much focus on operational and tactical level concerns Research has shown that the methodology by which readiness is reported and tracked is solely based on objective metrics and plans The current assessment methodology is effective at assessing

operational readiness but it was not designed to address strategic issues such as long term strategic competition rapid dispersion of technologies and new concepts of warfare It is important to understand that readiness defines not only the material capabilities to wage war but the non material capabilities to train and equip forces and more importantly the education and support mechanisms that build a resilient and ready force The operational aspect which is where the DoD focuses its readiness efforts only represents the surface of the true definition of readiness This paper offers a novel methodology to holistically assess strategic readiness The methodology described in this paper facilitates the analysis of seven strategic readiness dimensions including operational readiness lethality global posture mobilization readiness sustainment readiness resiliency and allies and partners By assessing them individually and then collectively against the National Defense Strategy objectives a holistic assessment can be published and utilized to assess the DoD s effectiveness at meeting their overall strategy This methodology provides the DoD a dynamic tool that is easily modifiable as strategic objectives change or as the strategy changes based on real world events or changes in political administrations More importantly the DoD can use the results of the assessment to course correct the strategy and refine their approaches to meeting national security objectives It is imperative that the DoD takes every step necessary to maintain an advantage against near peer adversaries like China Every dollar spent training hour utilized and decision delayed risks the ability of the U S to compete in the future Without making corrections now to the comprehensive understanding of readiness the DoD will be behind in great power competition for years to come Due to the bureaucracy of how the government and DoD functions decisions made now will have an impact for decades to come Evidence of this is the 20 year acquisition timeline for the F 35 and multiple failed programs mis managed from their onset and by many measures an inefficient use of government resources now under fire from the House Armed Services Committee Chairman By not making corrections along the way and adjusting resources to meet higher priority needs and requirements the DoD will not be as effective as possible A feedback mechanism with actionable information is necessary to aid in this area and assist senior leaders in steering the department towards success I recommend that the DoD adopts such a strategic readiness assessment methodology built off the current statutory requirements for operational readiness At the highest level Congress should amend the National Defense Authorization Act to include updates to Title 10 sections 117 and 153 and mandate at a minimum an annual Strategic Readiness Assessment This assessment should be briefed to the House and Senate Armed Services Committees prior to annual budget debates and in conjunction with SECDEF and CJCS testimony The intent of the assessment would be to inform budget decisions with respect to strategy and provide actionable information for senior leaders and congress The Undersecretary of Defense for Personnel and Readiness OSD P R would be primarily responsible for authoring the assessment and would rely heavily on other experts to inform the assessment Along with the Strategic Readiness Assessment OSD P R should host bi annual strategy development conference to review the strategy and provide updates to senior leaders

and congress Visualization of the assessment is critically important in ensuring that senior leaders understand the information and the impact of decisions made daily Using the current Defense Readiness Reporting System Strategic I recommend that a strategic readiness tool be implemented and employed in a dashboard type format and example which you will see in Chapter 4 This program will allow stakeholders to implement their assessments and using artificial intelligence see the impact of not only operational decisions but strategic decisions The DoD needs to take advantage of every opportunity to stay ahead of a rising Chinese global power Every domain every decision and every task will have a role in the strategic race It is imperative that the DoD thinks innovatively about how it measures strategic success and how it uses data to inform tactical and operational decisions that may unknowingly have strategic impacts The comprehensive strategic readiness of the DoD is an area of immense value if measured and assessed honestly After demonstrating effective utilization of the strategic readiness assessment methodology the DoD should share its assessment and results with other government agencies such as the Department of State and the Department of Treasury to truly reinforce the whole of government approach that is so desperately needed in great power competition Executive summary ICT Innovations 2009 Danco Davcev, Jorge Marx Gómez, 2010-01-06 This book is the result of the first International Conference ICT Innovations 2009 The ICT Innovations conference is the primary scientific action of the Macedonian Society on Information and Communication Technologies ICT ACT It promotes the publication of scientific results of the international community related to innovative fundamental and applied research in ICT Today ICT has enlarged its horizons and it is practiced under multidisciplinary contexts that introduce new challenges to theoretical and technical approaches The ICT Innovations 2009 conference gathered academics professionals and practitioners reporting their valuable experiences in developing solutions and systems in the industrial and business arena especially innovative commercial implementations novel applications of technology and experience in applying recent research advances to practical situations in any ICT areas The conference focuses on issues concerning a variety of ICT fields like Multimedia Information Systems Artificial Intelligence Pervasive and Ubiquitous Computing Eco and Bio Informatics Internet and Web Applications and Services Wireless and Mobile Communications and Services Computer Networks Security and Cryptography Distributed Systems GRID and Cloud Computing ICT Innovations 2009 Conference was held in Ohrid Macedonia in September 28 30 2009 Local arrangements provided by the members of the Macedonian Society on Information and Communication Technologies ICT ACT mainly consisting of teaching and research staff of Computer Science Department at Faculty of Electrical Engineering and Information Technologies and Institute of Informatics at Faculty of Natural Sciences both at Ss Cyril and Methodius University in Skopje Macedonia

Strategic Readiness Introduction

In today's digital age, the availability of Strategic Readiness books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Strategic Readiness books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Strategic Readiness books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Strategic Readiness versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Strategic Readiness books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Strategic Readiness books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Strategic Readiness books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Strategic Readiness books and manuals for download have transformed the way we access information. They provide a cost-effective and

convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Strategic Readiness books and manuals for download and embark on your journey of knowledge?
