The Calvinist Copernicans:

The Calvinist Copernicans R. H. Vermij, 2002 When it was published in 1543 Copernicus's new astronomy had an enormous impact on intellectual life in early modern Europe but the reception of his new ideas differed fundamentally from one country to another Rienk Vermij discusses how unlike in Roman Catholic lands discussion in the heavily Calvinist Dutch Republic was initially dominated by humanist scholars who judged Copernicus's work on its mathematical merits Yet even in this environment it could not escape eventual philosophical religious and political controversies This book shows how Copernicus's astronomy changed from an alternative cosmology into an established worldview in the Dutch Republic

The Hybrid Reformation Christopher Ocker, 2022-09-22 Three basic forces dominated sixteenth century religious life Two polarized groups Protestant and Catholic reformers were shaped by theological debates over the nature of the church

salvation prayer and other issues These debates articulated critical group defining oppositions Bystanders to the Catholic Protestant competition were a third force Their reactions to reformers were violent opportunistic hesitant ambiguous or serendipitous much the way social historians have described common people in the Reformation for the last fifty years But in an ecology of three forces hesitations and compromises were natural not just among ordinary people but also if more subtly among reformers and theologians In this volume Christopher Ocker offers a constructive and nuanced alternative to the received understanding of the Reformation Combining the methods of intellectual cultural and social history his book demonstrates how the Reformation became a hybrid movement produced by a binary of Catholic and Protestant self definitions by bystanders to religious debate and by the hesitations and compromises made by all three groups during the religious controversy

Humanism in an Age of Science Dirk Van Miert, 2009 In 1632 the Amsterdam regents founded an Athenaeum or Illustrious School This kind of institution provided academic teaching although it could not grant degrees and had no compulsory four faculty system Athenaeums proliferated in the first century after the Dutch Revolt but few of them survived long They have been interpreted as the manifestation of an evolving vision of the role of a higher education this book by contrast argues that education at the Amsterdam Athenaeum was staunchly traditional both in methods and in substance While religious philosophical and scientific disputes rocked contemporary Dutch learned society this analysis of letters orations and disputations reveals that a traditional and Aristotelian humanism thrived at the Athenaeum until well into the seventeenth century

Reformed Orthodoxy and Philosophy, 1625-1750 Aza Goudriaan, 2019-01-28 This book examines the thinking of several Reformed theologians on theological issues that are historically or by content related to philosophy Three Dutch authors from successive generations are considered in particular Gisbertus Voetius 1589 1676 Petrus van Mastricht 1630 1706 and Anthonius Driessen 1684 1748 A diversity of issues in Christian doctrine is discussed These include the relationship between theology and philosophy creation Divine providence the human being and Divine and natural law By reconstructing the views of these three theologians this book highlights similarities and differences within Reformed orthodoxy both in doctrine and in relation to philosophy The changes that thus become visible also suggest that biblical Christianity outlives the philosophical apparatus by whose assistance it is explained
